Babcock and Wilcox Emergency Protocol

For Postaccident Sample Analysis

The following individual is the point of contact within B&W for emergency notification that BSEP is preparing to ship a postaccident sample to the Lynchburg Research Center (LRC):

Emergency Control Officer (manned 24 hours): 1-804-522-5833

Required Information

When notifying the B&W Emergency Control Officer (ECO), the caller should be prepared to supply the following information:

1. The plant involved, the name of the individual making contact, and the name and telephone numbers of the responsible person at the utility to whom follow-up communication should be addressed.

2. The number and type of samples to be shipped; i.e., liquid, gaseous and/or charcoal cartridge.

3. Measured radiation levels from the shipping container at the surface and at three feet.

4. The estimated shipping time and time of arrival at the Lynchburg (Virginia) Municipal Airport. (If shipment by other than air transport is intended, the carrier and time of arrival at the Lynchburg Research Center should be specified.)
