Subject: Private Fuel Storage, LLC
Docket 72-22

Reference: Letter from Holtec International to U.S. Nuclear Regulatory Commission, dated
December 13, 1999 (Document ID: PFS023)

Dear Sir:

In our letter to you of December 13, 1999 regarding sensitivity studies for the HI-STORM 100 cask system as it relates to the PFS, LLC license application, we stated that we would be willing to receive technical representatives from the State of Utah at our offices to explain the large margins of safety embedded in the thermal design of the HI-STORM 100 System. We have since been informed by counsel that the proper forum to provide information to the State of Utah is through the discovery process in the PFSF licensing proceeding before the Atomic Safety and Licensing Board. Pursuant to this new information, we must withdraw our offer to host technical representatives from the State of Utah at our offices.

Please contact me at 856-797-0900, ext. 668 if you have questions or require additional information.

Sincerely,

Brian Gutherman, P.E.
Licensing Manager
