LICENSEES: Baltimore Gas and Electric (BGE) Company and Duke Energy Corporation (Duke)

FACILITIES: Calvert Cliffs Nuclear Power Plant, (CCNPP) Unit Nos. 1 and 2 and Oconee Nuclear Station, (ONS) Unit Nos. 1, 2, and 3

SUBJECT: SUMMARY OF DECEMBER 9, 1999, MEETING WITH BGE AND DUKE REGARDING LICENSE RENEWAL ACTIVITIES FOR CCNPP AND ONS

On December 9, 1999, the U. S. Nuclear Regulatory Commission (NRC) staff held a public meeting with representatives of BGE and Duke at Rockville, Maryland, to discuss the status of the NRC's review of BGE's and Duke's license renewal applications (LRAs) for the CCNPP Units 1 and 2 and the ONS Units 1, 2, and 3. Enclosure 1 to this meeting summary provides a list of the meeting attendees. Enclosure 2 provides a copy of slides that were used by NRC, BGE, and Duke to summarize the status of the review of BGE's and Duke's LRAs.

Highlights from the BGE portion of the meeting:

The NRC staff opened the meeting by summarizing the progress on the BGE LRA review (NRC slide 4 in enclosure 2). Of note was the issuance of the November 16, 1999, safety evaluation report (SER) related to the license renewal of the Calvert Cliffs Nuclear Power Plant Units 1 and 2 which documented to closure of all open and confirmatory items. The staff stated that the third license renewal inspection was conducted the week of November 29, 1999, and the one item that remained open at the end of the inspection regarding scoping would be addressed in the SER when it was issued as NUREG-1705, which was currently scheduled to be issued by December 20, 1999.

BGE summarized their objectives for the meeting, as well as summarizing progress regarding last meetings performance indicators. BGE asked if the staff felt another meeting was needed to discuss the final resolution of the form of the new license. The staff stated that based on the success of the previous discussions (November 22, 1999 public meeting held to discuss the form and content of the renewed licenses) that it did not see the need for additional discussions. The staff also expressed its appreciation to BGE for their support for their efforts to assist the staff with the development of Appendix E to NUREG-1705. BGE closed by suggesting performance indicators for the next management meeting in January 2000.

Highlights from the Duke portion of the meeting:

The staff provided Duke with an "end game" schedule for the completion of the review (See Enclosure 2). The staff noted that it issued a list of all the remaining open items in a letter dated November 18, 1999. Duke and the staff held a separate meeting the morning of December 9, 1999 to discuss the resolution of these items (see meeting summary dated December 14, 1999). Duke stated that it believed that it could provide a response to all the remaining issues by December 17, 1999. Duke also stated that it would issue a license amendment request by the end of the year to clean up the existing licenses for Oconee Units 1, 2, and 3. The staff noted that the operating reactor project manager, Dave LaBarge, was coordinating this activity with the Oconee site licensing personnel. The staff noted that the Final Supplemental Environmental Impact Statement was issued on December 9, 1999, and that it would be transmitted to the Environmental Protection Agency shortly.
