Columbia, SC 29206

Dear Ms. Thomas:

We have received your submittal dated March 26, 2000, to withdraw draft NUREG-1718, "Standard Review Plan for Review of an Application for a Mixed Oxide (MOX) Fuel Fabrication Facility." In your submittal, you have requested that the Nuclear Regulatory Commission (NRC) conduct an administrative proceeding to address your concerns. The Standard Review Plan, which is currently in draft form, is an Agency guidance document that imposes no legally binding requirements. Under the NRC's rules of practice in 10 CFR Part 2, the Commission does not offer adjudicatory hearings on the issuance of Agency guidance documents. Accordingly, the NRC staff will treat your concerns as comments on the Standard Review Plan and will consider your submittal along with other public comments received on the document. Note that, if the NRC receives an application for a MOX facility in the future, an opportunity for an adjudicatory hearing on that licensing action will be noticed in the Federal Register.

Sincerely,

Andrew Persinko
MOX Project Manager
Special Projects Branch
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards
