Subject: Dose Modeling Workshop

Boby, Just a note to let you know that the NRC staff should be commended for the good work presented at the June 7&8 workshop on Dose Modeling Guidance. The approach taken by the staff should give licensees the tools needed to model the dose in a manner which will demonstrate compliance with Subpart E.

Congradulations to the staff on a job well done!
I am looking forward to the workshop on "Real Cases".

I tried to send this message to John Greeves but I do not seem to have his correct e-mail address. Would you please pass this message to John and the other presenters.

Phil Rosenthal
