MEMORANDUM TO: David L. Meyer, Chief
Rules and Directives Branch
Division of Administrative Services
Office of Administration

FROM: Larry W. Camper, Chief **/RA/**
Decommissioning Branch
Division of Waste Management
Office of Nuclear Material Safety
and Safeguards

SUBJECT: NOTICE OF PUBLIC WORKSHOP TO DISCUSS CURRENT ISSUES
ASSOCIATED WITH THE DECOMMISSIONING OF NUCLEAR
FACILITIES

Attached please find one signed original of the subject Federal Register notice for your transmittal to the Office of the Federal Register for publication. Also attached are five copies of the signed notice and a 3.5" diskette with the notice in WordPerfect.

Attachments:

1. One signed copy of FRN
2. Five copies of FRN
3. 3 x 5" Diskette of FRN

UNITED STATES NUCLEAR REGULATORY COMMISSION
PUBLIC WORKSHOP TO DISCUSS CURRENT ISSUES ASSOCIATED
WITH THE DECOMMISSIONING OF NUCLEAR FACILITIES

United States Nuclear Regulatory Commission (NRC)

Notice of a Public Workshop to Discuss Current Issues Associated with the Decommissioning of Nuclear Facilities

SUMMARY: This notice announces a Public Workshop to discuss current issues associated with the decommissioning of nuclear facilities. The goal of the workshop will be to provide a forum for NRC staff to discuss, with nuclear industry and other interested stakeholders, NRC's process, and guidance, for developing and evaluating decommissioning plans (DPs) and license termination plans (LTPs), current issues associated with the decommissioning of nuclear facilities and to identify areas and strategies for improving the decommissioning process.

SUPPLEMENTAL INFORMATION:

On July 21, 1997, the U.S. Nuclear Regulatory Commission (NRC) published the final rule on Radiological Criteria for License Termination (the License Termination Rule or LTR) as Subpart E to 10 CFR Part 20. NRC regulations require that materials licensees submit DPs to support the decommissioning of its facility if it is required by license condition, or if the procedures and activities necessary to carry out the decommissioning have not been approved by NRC and these procedures could increase the potential health and safety impacts to the workers or the public. NRC regulations also require that reactor licensees submit Post-shutdown Decommissioning Activities Reports and LTPs to support the decommissioning of nuclear power facilities.

Since the promulgation of the LTR, NRC staff has been developing guidance to assist both regulators and the regulated community in complying with the LTR. To facilitate early and continuing input from the regulated community and other stakeholders on this guidance, NRC held several workshops in 1998, 1999, and in 2000 on various technical issues associated with the decommissioning of nuclear facilities. As part of our continuing efforts to involve the regulated community and other stakeholders in our decommissioning program, we will hold a workshop November 8-9, 2000, at the Commission's Headquarters building in Rockville, Maryland to discuss our current process for reviewing information supporting the decommissioning of nuclear facilities and to obtain perspectives from interested stakeholders on the manner in which we are implementing the LTR.

The workshop will be held at the NRC Headquarters, in the Auditorium of Two White Flint North Building at 11545 Rockville Pike, Rockville, Maryland. This workshop will be open to the public and registration will be held from 7:45 to 8:30 a.m. on the first day of the workshop, November 8, 2000, at the entrance of the Auditorium. There will not be pre-registration. The workshop will run from 8:30 a.m to 4:45 p.m. on both days. Each day will feature presentations from NRC headquarters and regional staff and roundtable discussion on current issues in decommissioning. In addition, we plan to have the workshop transcribed, and the transcripts, and any material presented at the workshop, will be posted on the NRC's Website.

NRC strongly encourages all interested stakeholders to attend and participate in this workshop, as it will offer a unique opportunity to provide the NRC staff and the nuclear power industry with insights, perspectives, and information that stakeholders feel is important for the NRC staff to consider as it seeks ways to improve our decommissioning program.

FOR FURTHER INFORMATION CONTACT: Dominick A. Orlando, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, at (301) 415-6749.

Dated at Rockville, Maryland this 3rd day of August, 2000.
