RE: Change of ownership for NRC licenses # 22-12602-03G and 22-12602-02

To Whom it may concern:

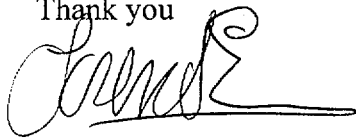

TSI Incorporated merged with and into JJF Group, Inc. effective 3 May 2000. In accordance with NRC regulations, the information necessary for such a transfer is below (as taken from NUREG 1556-Volume 7).

1. *The new name of the licensed organization:* There will be no name change to TSI Incorporated, or the licenses listed above.
2. *The new licensee contact and telephone number:* There is no change to the Radiation Safety Officer for TSI Incorporated, so the contact remains Loren Evers, (651) 490-2884.
3. *Personnel having control over licensed activities:* There is no change in the individuals named RSO and authorized users on the licenses listed above. In addition, there will be no change in the immediate corporate structure overseeing the license activities.
4. *Will the transferor remain in a non-licensed business without the license:* There is no transfer of license in this particular merger. TSI Incorporated will maintain the license and all activities related to the license. TSI Incorporated will still exist as a separate legal entity, and therefore there is no transferor.
5. *Description of the transaction:* TSI Incorporated merged with and into JJF Acquisition Inc. The surviving corporation was TSI Incorporated, a Minnesota Corporation. As a result of the merger, TSI Incorporated has a parent company, JJF Group, Inc. (a holding company), rather than several public shareholders as its owner. A copy of the agreement and plan of merger is on file with the SEC's EDGAR Files. There is no transfer of control within the company.

6. *Description of any changes in organization, location, facility, equipment or procedures:* There will be no changes to any of the items listed in question six.
7. *Description of any changes in the use, possession, location or storage of licensed materials:* There will be no changes to any of the items listed in question seven.
8. *Changes in organization, location, facilities, equipment, procedures or personnel that would require a license amendment even without the change of ownership:* There will be no changes to any of the items listed in question eight.
9. *Indication of whether all surveillance items and records will be current at the time of transfer:* All records are current at this time.
10. *Confirmation that all records concerning safe and effective decommissioning of the facilities, public dose, and waste disposal records have been transferred to the new licensee:* All of the above records will be retained at TSI Incorporated.
11. *Description of the status of the facilities:* Currently, the facility is free of any contamination.
12. *Description of decontamination plans, including financial assurance arrangements:* Not applicable to this particular facility.
13. *Confirmation that the transferee agrees to abide by all commitments and representations previously made to the NRC by the transferor:* Control of the license will be kept with TSI Incorporated, who will follow all previous commitments and representations made to the NRC.
14. *Documentation that the transferor and transferee agree to the change in ownership or control of licensed material and activity, and the conditions of transfer, and the transferee is made aware of all open inspection items and its responsibility for possible resulting enforcement actions:* There is no transfer of control of the license, nor are there any open inspection items.
15. *A commitment by the transferee to abide by all constraints, conditions, requirements, representations, and commitments identified in existing NRC licenses:* TSI Incorporated. will maintain control of the licenses and will continue to abide by all NRC requirements.

Please review the above information and feel free to contact me at any time if you have any questions with the information provided.

Thank you

A handwritten signature in black ink, appearing to read "Loren S. Evers", with a long horizontal flourish extending to the right.

Loren S. Evers
TSI Radiation Safety Officer
