Selected Licensee Commitments Manual (SLC)

Gentlemen:

Pursuant to 10CFR 50.4 and 50.71, please find attached 7 copies of the latest revisions to the Oconee Selected Licensee Commitments Manual (SLC). The SLC Manual is Chapter 16.0 of the Oconee Updated Final Safety Analysis Report (UFSAR). This manual is intended to contain commitments and other station issues that warrant higher control, but are not appropriate for inclusion into the Technical Specifications (TS). Instead of being updated with the annual UFSAR Update, the SLC Manual will be updated as necessary throughout the year.

Very truly yours,

W. R. McCollum, Jr.
Vice President
Oconee Nuclear Station

To: Manual Holders

Subject: Oconee Selected Licensee Commitments Manual (SLC)
Revision

On June 6, 2000, Station Management approved revisions to SLC 16.12.2 Refueling Operations, to be implemented on 6/6/00. The change is a simple clarification that both the permanently installed area monitor and the portable bridge monitor must be operable during fuel handling, or a suitable substitute employed for each. During the revision some text rolled over onto the next page. This page 16.2.2-2 was inadvertently omitted from the distribution package.
