and Government Affairs
Atlas Corporation
370 Seventeenth Street, Suite 3140
Denver, CO 80202

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION

Dear Mr. Blubaugh:

By your letter of April 20, 1999, you requested an amendment to Atlas Corporation's U.S. Nuclear Regulatory Commission (NRC) Source Material License No. SUA-917. The proposed amendment would permit Mid-Atlantic Pipeline Company to install a new gas pipeline in its existing easement across Atlas' property, within the restricted area of the site.

We have reviewed the plan, "Installation of New Gas Pipeline within Restricted Area of the Atlas Mill Tailings Site," and accompanying material provided in your submittal, and found it to be incomplete. The additional information needed in order to complete our review is identified in the enclosure.

Additionally, your request must address requirements stemming from the National Environmental Policy Act, as codified by NRC in 10 CFR Part 51. You need to provide an environmental report (ER), a supplement to an existing ER, or justification that an ER is not required.

If you have any questions, please call me or Myron Fliegel, the NRC project manager for the Atlas site. I can be reached at (301) 415-7238 and Dr. Fliegel at (301) 415-6629.

Sincerely,

[Signed by]

N. King Stablein, Acting Chief

Docket No. 40-3453
License No. SUA-917

Enclosure: As stated

cc: See attached list

**REQUEST FOR ADDITIONAL INFORMATION
ATLAS CORPORATION NEW GAS PIPE LINE INSTALLATION**

1. Please provide a map showing the location of the pipeline relative to the rest of the Atlas site. The maps provided do not show this information.
2. The highway designation on the drawing is U.S. Highway 163. Is this the correct highway or should it be U.S. Highway 191?
3. Where will the contaminated materials be placed after their removal during right-of-way decontamination?

The plan indicates that the contaminated material will be transported to a central location within the site and then covered or sealed. Is this the tailings pile? If so, please provide more details on where, in the tailings pile, the material will be placed and whether it will be covered in a manner similar to the temporary cover currently on the pile. If the proposed location of the material is outside the pile, please identify the location and address the requirements in Criterion 6 of 10 CFR Part 40, Appendix A.

4. After the surface areas have been cleaned, how will the pipeline trench material be verified as clean or within the required limits, and who will do this verification?

The information indicates that the right-of-way for the pipeline is going to be approximately 150 feet wide and approximately 1400 feet long. This should be enough room in which to work and keep clean material. It was not clearly indicated who would verify that the trench material is clean. Please identify who will perform that function.

5. Who is providing the radiation safety and contamination control coverage, Atlas or Mid-Atlantic Pipeline Company? What are the qualifications of the individual(s) involved, if it is not the Atlas radiation safety officer? What procedures will be used?

The cover letter dated April 20, 1999, indicates that the Atlas Site personnel monitoring procedure will be used. Since the work is being performed in the Atlas Site restricted area, Atlas radiation safety staff could provide the coverage and use their procedures. However, this is not clearly stated as such.

6. The licensee needs to provide a map or drawing showing where the samples, whose analyses were reported in the accompanying report from Barringer Laboratories, were taken.

U.S. Nuclear Regulatory Commission

Docket No. 40-3453

Moab Mill Reclamation Trust

Notice of Order and an Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Order transferring License No. SUA-917 for the Moab, Utah facility and site from Atlas Corporation to the Moab Mill Reclamation Trust; notice of opportunity for a hearing.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has signed an Order (copy attached) dated December 27, 1999, transferring Source Material License SUA-917 for the Moab, Utah, facility and site from Atlas Corporation (Atlas) to the Moab Mill Reclamation Trust (Trust). On September 22, 1998, Atlas filed a petition for relief under Chapter 11 of the U.S. Bankruptcy Code. After filing for relief, Atlas entered into settlement discussions with NRC, the State of Utah, and other parties to the bankruptcy proceeding regarding the reclamation and disposition of the Moab Mill Site. Those discussions resulted in the development of the Moab Uranium Millsite Transfer Agreement (Settlement Agreement) which provides for transfer of the Moab Mill Site and the NRC license to a trust, the trustee of which would carry out remediation of the site pursuant to the terms and conditions of NRC License SUA-917, as amended on June 24, 1999. The terms and conditions of NRC License SUA-917 include the reasonable and prudent alternatives (RPAs) and reasonable and prudent measures (RPMs) in the U.S. Fish and Wildlife Service's final biological opinion (FBO) dated

July 29, 1998 (included in the NRC's "Final Environmental Impact Statement Related to Reclamation of the Uranium Mill Tailings at the Atlas Site, Moab, Utah," (FEIS) NUREG-1531, published in March 1999), as well as mitigative measures developed by the NRC staff. The Settlement Agreement was submitted to the United States Bankruptcy Court for the District of Colorado for approval on April 29, 1999. On December 1, 1999, the Court issued an Order confirming the second amended plan of reorganization of the Atlas Corporation, which includes the Settlement Agreement.

FOR FURTHER INFORMATION CONTACT: Myron Fliegel, Office of Nuclear Material Safety and Safeguards, Washington, DC 20555-0001, telephone (301) 415-6629, e-mail mhf1@nrc.gov.

Dated at Rockville, Maryland, this 27 day of December 1999.

For the Nuclear Regulatory Commission.

Michael C. Layton, Acting Chief
Uranium Recovery and
Low-Level Waste Branch
Division of Waste Management
Office of Nuclear Material Safety
and Safeguards
