MEMORANDUM TO: File

FROM: Thomas W. Alexion, Project Manager, Section 1 */RA/*  
Project Directorate IV & Decommissioning  
Division of Licensing Project Management

SUBJECT: ARKANSAS NUCLEAR ONE, UNIT 2 RE: PROPOSED LICENSE  
AMENDMENT ON SETPOINT CHANGES AND RELATED ITEMS FOR  
THE REPLACEMENT STEAM GENERATORS (TAC NO. MA7299)

The U. S. Nuclear Regulatory Commission (NRC) staff has had discussions with Entergy Operations, Inc., the licensee, on its November 29, 1999, application on "Proposed Technical Specification Changes And Resolution of Unreviewed Safety Question Associated With Applicable Limits And Setpoints Supporting Steam Generator Replacement." The steam generators are scheduled to be replaced during the 2R14 refueling outage, currently scheduled for September 2000.

In order to facilitate these discussions, the licensee has provided the NRC with preliminary information. This information may not represent the licensee's final response because it may be revised as a result of discussions between the licensee and the NRC. Following these discussions, the licensee will formally submit the information that it intends to finalize.

The purpose of this memorandum is to place the attachment in the Public Document Room.
