Dear David L. Meyer,

I am very opposed to the High
Level Nuclear Waste Storage Facility
Proposed on the Skull Valley
Reservation, Utah.

First of all transporting these
kind of materials could prove to be
very dangerous!!

This nuclear waste facility is
proposed to be temporary!! What a
waste of money!!! Then there is
no guarantee the waste will
be removed. That means we are
left holding the bag.

It sounds like to me that no one
has come up with the right solution.
With all the intelligence that we have
in this country & the modern technology
we have at our finger tips. Why
can't someone figure a better solution!!

Template ADM-013

We are depending on all of you
to come up with a better solution!
Has prayer gone out the window?
Do we feel more superior than
our forefathers who wrote the
Declaration of Independence?
There is a man out there that
has the right solution, listen
with your hearts!!! I don't
think that anyone of us would
want this waste in our back
yards and I am sure that another
country wouldn't either.

We in Utah and everywhere
are depending on your expertise in
solving this matter in a civilized
way to benefit all of us.

Sincerely
Mr. Larry Hawkins
