The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

General comments on entire process -
Special consideration to risk analysis which ignores children, pregnant women, and other vulnerable populations.

2. Please state your comment(s)?

I am opposed to a temporary solution to a permanent problem. The spent fuel should be kept in situ until a permanent resolution can be established. Saving private utilities from their current situation is NOT good public policy. Utah has an overabundance of hazardous waste right now. See comments of representative of Mayor Ross Anderson, also Steve Brickman, Jason Groenewald and others. More hearings are needed. Private commenting process is no substitute for the democratic public hearing process. This could not happen in NY, California or most other states. The people of Utah are learning that authority is not always right. This is not the place to dump the nation's waste.

3. To receive a copy of the final EIS please provide your mailing address
