Plant Support Branch

Subject: **Revisions to the "Security Plan for the Protection of Reactor Facilities Under License R-33"; June, 1996.**

Reference: License R-33, Docket 50-73.

Dear Mr. Murray:

Enclosed are revised pages to the "Security Plan for the Protection of Reactor Facilities Under License R-33".

These revisions describe a new badging and site access system for the Vallecitos Nuclear Center (VNC). There are no changes in access control to the actual reactor facilities. In addition, changes to the schedule for testing the site communications system are implemented.

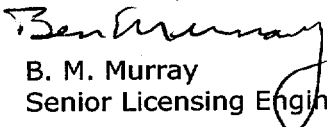

These changes do not result in any decrease in the effectiveness of the security plan.

Revisions are enclosed as Attachment B to this letter. Changes are marked with a vertical line in the left-hand margin. A brief description of each change is included in Attachment A.

Any questions or need for further information should be directed to B. M. Murray on (925) 862-4455.

As the enclosed plan contains information concerning the safeguarding of reactor facilities, GE requests that it be withheld from public disclosure pursuant to 10CFR2.790(d).

Sincerely,

  
B. M. Murray  
Senior Licensing Engineer

  
C. W. Bassett, Manager  
Regulatory Compliance
