On KTVX Utah news last night reference was made to disposal of nuclear waste on Indian Reservation land. The NRC lady who was interviewed stated that there was no risk at all in the barrels used to store it, etc. IF there is no risk, (which is highly unlikely) and IF everything is just "a-ok" (which is also highly unlikely) then why not just keep the nuclear waste in the State in which it was produced. We Utahans do not want it. We will not be a dumping ground for other State's materials. I vehemently oppose sending this waste to Utah, especially on Indian Reservation ground. Give it up and find a place in the State in which it was produced. Thank you.... Barbara LeDuc
