Subject: Re: RE: Storage of nuclear waste on Goshute Indian Reservation, Utah

Thank you for your comments. They will be added to the record of comments on the proposed nuclear waste storage facility in Utah.

>>> Pat Crooks <PCrooks@lgy.com> 08/22 12:09 PM >>>

The NRC held a public forum in Utah last night to receive public input to the proposed storage of nuclear waste on the Goshute Indian Reservation. As a resident of the State of Utah, I want to register my vote against this proposal.

The NRC contends that the storage of nuclear waste on the reservation is safe and poses no danger to the surrounding communities. If the nuclear waste can be safely stored - why not store it in the states where it is currently located. Utah should not be the dumping ground for nuclear waste from other states. Nor should the NRC jeopardize citizens across the country through transporting the nuclear waste.

I strongly oppose this move and will add my efforts to fight the move of nuclear waste to Utah.

Sincerely,
Pat Crooks
