Subject: nuclear wastes in consumer products

DOCKETED
SEP 11 2000
SEP 11 P3:19

We demand that you keep radioactive wastes and materials from nuclear power and weapons isolated from the public and the environment, and prohibit any "releases" from regulatory control. Also that you prohibit radioactive materials from entering the consumer marketplace or anywhere but licensed radioactive facilities. We want you to recapture that which has been released and work for an International Prohibition on radioactive "release".

You have been entrusted with public safety. How can we have any confidence in your agencies when you permit such dangerous practices?

Sincerely,
Steven and Joyce Kuschwara
92 Troumaka Street
Toms River, NJ 08757
