This email is being sent to voice personal opposition to not only ALL but any high-level nuclear waste being "stored" in the state of Utah. For some reason the powers that be consider Utah and it's "beautiful, serene, virgin desert" to be so remote from the populace of the U.S. as to be the perfect place for the waste to be "stored". Not only does this affect the property value of the entire state, but more importantly it affects the health of the city dwellers as well as the ranchers, farmers, rural dwellers, and the American Indian population of many of the areas being considered for the nuclear "dumping". This is not an acceptable solution. It is a "rethink" situation.

Yours truly,

Kerry and Judy Bodily
Salt Lake City, Utah
