US Nuclear Regulatory Committee
Washington DC 20555-0001

Mr. Meyer + Nuclear Regulatory Committee:
I strongly oppose the storage
of nuclear waste from Private
Fuel Storage (or any other utility
organization) to be stored in Utah
at the proposed Goshute Reservation
Nuclear Waste Storage facility.
Utah is not a garbage dump for
the rest of the country. I fear
for our safety + even survival of
our grandchildren for generations,
as Utah is full of shifting
faults + areas that experienced earthquakes.
Mixing nuclear waste + an earthquake
would be fatal. There are 2 faults
in the area of the site + three others
in close proximity. I sincerely hope
you take the health + well being of

Template ADM013

ERDS-03
Add Scott Flanders (SCF) ADM03

Utahns and the millions of other
US citizens into consideration.

Do not send this ^{waste} fuel to Utah.
It is safer to keep it where it is
produced. It is short sighted and
reckless to ship millions of
spent fuel rods across the country
to store them for the suggested
20 years, only to move them
again. This increases the risk
of accident yet again.

Please pay attention to the people
of Utah, the Goshute tribal
members who see the danger +
don't approve this disaster waiting
to happen.

Sincerely -
Molly Prince
