(79)

Dear Scott,

As a life long resident of Utah I am opposed to Utah becoming the dumping grounds for nuclear waste. As a real estate professional I am greatly concerned about the damage that will be done to property values if we were to end up the recipients of such energy waste products.

I know there are other options. Utah has become one of the greatest places to live in the world. Let's not destroy what we have worked so hard to achieve.

Sincerely,

Dave Belnap
