To Whom it May Concern;

On the evening of September 17, 2000 I was advised via a local Salt Lake City, Utah news telecast that there is a proposal to place a nuclear fuel disposal/storage facility within the boundaries of one of the Indian reservations that is within approximately 45 miles of SLC. Per the news station, there is supposed to be a place to cast a vote or opinion regarding the placement of the alleged facility, but I do not see same on your web site. (it was reported as nrc.com)

FOR THE RECORD: Although I fully support the use of nuclear fuel application(s), I am completely opposed to a DISPOSAL facility installation within the proximity of ANY major city. This great country has millions of miles of waste lands which are not located near major cities, that is where such facilities should be located, not within the close proximity of some 2 million plus people.

Some IDIOTS have already placed a chemical weapons disposal system/facility within a few miles of this city, rather than out in the West desert, we do not need another disposal or storage facility here. Please advise as to the correctness of this News story (concerning the Proposed Indian Reservation Nuclear facility).

Per the Indian reservation representatives who were speaking on the news story, they claim that their land is to do with as they desire and the NON-INDIAN citizens OFF the reservation(s) do not have a say. Where the hell is John Wayne when we need him??

Bob Miller
Citizen of Salt Lake City
