Country: USA

Comments: I am in opposition to any storage of nuclear waist on the Goshute Reservation. Utah does not produce any nuclear and should not be required to be the dumping sight for any waist. This should not be a decision for some fly by night corporation to make there money, dump the waist and run. I live 50 miles from the sight in Sandy, Utah and feel you are endangering my families saftey and health. I don't believe this will be a temporary sight for storage and I believe the credibility of the goverment with respect to the risks of nuclear power and it's waist was demonstrated clearly in the 1950's when army soldiers were required to watch nuclear expositions in Nevada and be exposed to all the radiation, etc., under the pretense of preparing to fight a nuclear war.

Private companies should not have the power to endanger citizens of a state as the nuclear waist spends 100's of thousands of years to degrade into less harmful daughter products. This waist should be stored in the basements of whoever is reading this message, and the owners of the companies who make the money from dumping this waist. Then we could see how safe you and they really think it is? I hope our Governor Mike Leavitt has the same courage as Cecil Andrus did in Idaho to stand up to you people.

Sincerely, a concerned citizen, David Salter...
