Country: USA

Affiliation: I Live nere there

Comments: I am an 18 year old who has lived in Tooele County for half of my life, The thought of living here any longer makes me sick to my stomach. Those who think that no harm will come from these chemical and now maby nuclear waste sights wont ever harm any one are dead wrong, with all of the leaks that happen at the Tooele Insinerator, it is just a matter of time before one of them does any harm. The Goshutes claim that the money that they will get will help their economy, who needs a good economy if they all die of exposure to nucular waste. And furthermore these people need to take a step back and remember that they too have familys, they too will someday leave the land to their children, is that really how they want to leave it? The worlds Dumping grounds for anything toxic? Personaly I would rather have a poor economy instead of having a nice green glow from radiation to me.
