Re: NUREG-1714, Draft Environmental Impact Statement (DEIS) for the Proposed
Private Fuel Storage LLC (PFS) Independent Spent Fuel Installation (ISFSI)

Dear Messrs. Meserve, Gover, Fry, and Ms Morgan:

On behalf of our organization, "Citizens Against Radioactive Waste in Utah," we respectfully request additional public hearings to be held as well as a six month extension to the September 21st public comment period for the above referenced DEIS on the Reservation of the Skull Valley Band of Goshute Indians and the related transportation facility in Tooele County, Utah, (NUREG-1714, Docket No. 72-22, Private Fuel Storage, L.L.C., June 2000).

This proposed facility would impose enormous consequences on the State of Utah. Due to the significance of this facility our local public officials and citizens expect more than the NRC minimum requirements for public hearings, notifications and accessibility to the Draft Environmental Impact Statement. The public needs to have a fair amount of time to review the DEIS and receive other pertinent information addressing emergency preparedness, risk factors on the transportation corridors, and financial information guaranteeing long-term financial stability of this proposed site. We have grave concerns regarding damage perception issues. Effected industries need time to conduct public surveys calculating potential economic losses. For example, to what extent would real estate values along the transportation route to the Goshute Indian Reservation be effected? To what extent would the tourist industry be effected by a general public perception that Utah was the radioactive waste

dump of the United States? To what extent would storing radioactive waste near the Hill Air Force bombing range impact the mission at Hill Air Force Base?

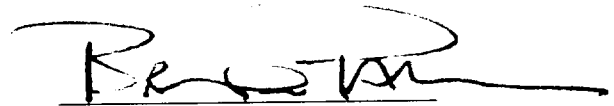

We also, have grave concerns on how the NRC hearings were conducted. The general public did not receive adequate notice of the hearings. The hearings were conducted away from towns and cities that will be effected by the transportation corridors. Many people in such towns were not able to attend and participate. Because the hearings were overcrowded, comments were restricted to two minutes, many people left thinking their comments would not be heard or that they would not have time to speak and address issues appropriately.

In addition, we are concerned that the NRC has not taken into account the concerns raised in Representative James Hansen's letter to the Atomic Safety and Licensing Board dated June 23, 2000, concerning of alleged irregular financial arrangements between the PFS and members of the Skull Valley Band of Goshutes. It is also our opinion that the NRC has overlooked the failure of the Bureau of Indian Affairs to ensure that all aspects of this proposal comply with federal law. It is our intention to inform the Committee on Environment and Public Works of these concerns and of our request to extend the public comment period.

We have enclosed a copy of Representative James Hansen's letter for your convenience. In addition you will find enclosed herewith copies of petitions we have received from concerned citizens from all around the state opposing the storage of radioactive waste on the Goshute Indian Reservation and asking for an extension of time to express their concerns on this matter.

Atomic Safety and Licensing Board
Nuclear Regulatory Commission
Washington, DC 20240

Dear Atomic Safety and Licensing Board Members;

As the Representative of the First Congressional District of Utah, as a senior member of the House Armed Services Committee, and as the Chairman of the House Subcommittee on National Parks and Public Lands, I most vigorously oppose the licensing, construction and operation of any high level nuclear waste storage facility in Skull Valley, Utah. I believe this proposal is bad public policy, dangerous to our national security and the economy of Utah, fundamentally unsafe and possibly illegal.

I believe strongly that it is bad public policy to consider any "temporary" high level storage facility before final determination of the permanent depository location is concluded. Moving this waste twice will greatly increase both the costs and the risks of the entire program. In addition, there is no guarantee that this facility will be temporary and as such any determination should be made with the full rigor of a permanent depository. The Skull Valley proposal cannot and does not meet that much higher standard.

Locating a high level nuclear waste storage facility under a critically important and very active military test and training range, that is not already burdened with such restrictions, is harmful to national security and dangerous to the local population. The Secretary of the Air Force and the Air Force Chief of Staff have repeatedly testified that the Utah Test and Training Range (UTTR), including the airspace over the proposed facility site, is an irreplaceable testing and training area. The continued, unrestricted availability to this unique national asset is critical to the Air Force's military readiness. With this in mind, I was shocked to see that the agencies consulted for the Draft EIS did not include the Department of Defense or the Department of the Air Force. The NRC did consult the Census Bureau, but not the Pentagon! I find this to be a gross oversight and reason enough to reject the entire Draft.

With or without airspace restrictions, the nature of the proposed facility creates an unacceptable risk that the Air Force will be forced to curtail operations in the area in the future.

Any loss of access in this area will have a significant and negative impact on the United States Air Force mission and military readiness. For instance, if the area is identified on an Area Planning Guide, thereby requiring the Air Force to implement special flight restrictions, then it would likely result in an "avoidance" standing order. While the NRC would not technically have restricted the airspace, the Air Force would restrict use to ensure compliance.

In addition, tests of unmanned, long-range cruise missiles and other emerging, large footprint weapons are permitted, and have been conducted, within 1 mile of the site. By the nature of these tests accidents do happen. Just last year, a cruise missile crashed in the same Military Operating Area beneath which the PFS facility is proposed. Over the last decade, there have been over a dozen crashes of F-16 fighters, and other military aircraft, within the UTTR. Nuclear waste storage and military bombing and test ranges simply should not be mixed.

I passed a law in 1999, section 2815 of the National Defense Authorization Act, which directed the Secretaries of Defense, Interior, Air Force and Army to conduct a study to evaluate the impact upon military training, testing and operational readiness of any proposed changes in land management of the Utah national defense lands, which includes all of the land beneath the UTTR. That study has not been completed, and as such, no planning by the Department of Interior for any purpose can proceed on these lands. I have attached a letter from the Department of Interior's Office of the Solicitor which clearly states this legal opinion.

In addition to its impact on military readiness and national security, restrictions on the operation of the UTTR would have devastating consequences for the economy of Utah. Weakening of the UTTR will cripple the military value of Hill Air Force Base and subject it to possible closure in a future round of base closures. With nearly 15,000 direct employees and billions of dollars in annual economic impact, any negative impact on Hill Air Force Base must outweigh any marginal economic benefit of the Skull Valley facility.

As many others have pointed out, this proposal is risky and unsafe. The combination of nearby military ranges, questionable seismic data, and its vicinity to the chemical weapons storage and demilitarization facility in Tooele is a recipe for disaster. Dry cask storage at the generating reactor sites until a permanent storage solution, such as Yucca Mountain, can be completed is clearly the safer and less expensive alternative.

Lastly, I am very concerned about the financial irregularities of this deal. I will be bringing the full and proper oversight powers of the House of Representative's Resources Committee to bear on this request. I am also initiating action to begin a legal review of the financial deal struck between PFS and some members of the Skull Valley Band of the Goshutes. This legal investigation will also examine the failure of the Bureau of Indian Affairs to ensure all aspects of this proposal complied with federal law, DOI and BIA regulations.

Page 2

This brief overview only begins to outline my objections to this proposal. I will continue to do all that is within my power to ensure that no "temporary" high level nuclear waste storage facility will be located in Skull Valley, or indeed anywhere in the State of Utah.

Sincerely,

A handwritten signature in dark ink, appearing to read "James V. Hansen", written over a diagonal line that extends from the bottom left towards the center of the page.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

Executive Committee: Chairman: Jim McConkie; Brent D. Ward; Robert Bradley; Rocco J. Navarro/ Executive Director: Anne Sward Hansen

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions from the Utah Department of Environmental Quality DEIS (Draft Environmental Impact Statement) review, I recognize the enormous and potential risks to our citizens. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

Executive Committee: Chairman: Jim McConkie; Brent D. Ward; Robert Bradley; Rocco J. Navarro/ Executive Director: Anne Sward Hansen

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. **We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process.** (please print)

This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. **We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process.** (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential transportation corridors. This proposed facility and transportation routes will damage perceptions of Utah and create negative stigma potential economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state bring closures to Hill Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies structures that would demonstrate a sound analysis for safe operations and long-term stability. The costs for emergency response training and the citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and as a solution waste policy.

We demand that the Nuclear Regulatory Commission extend the comment period to another minimum 6 months /or end

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens living near the transportation corridors. This proposed facility and transportation routes will damage perceptions of Utah and create negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. This unprecedented facility could bring closures to Hill Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies fail to disclose complete financial structures that would demonstrate a sound analysis for safe operations and long-term stability. The costs for emergency response training and technical operations to safeguard our citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and as a solution for lack of a national nuclear waste policy.

We demand that the Nuclear Regulatory Commission extend the comment period to another minimum 6 months /or end the licensing process.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. **We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process.** (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth

to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

Executive Committee: Chairman: Jim McConkie; Brent D. Ward; Robert Bradley; Rocky Navarro/ Executive Director: Anne Sward Hansen

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit or value to the citizens of Utah. Under the directives of the Utah Department of Environmental Quality review, we recognize the enormous and potential risks to our citizens living near the transportation corridors, the devaluation of property, and the economic losses that would occur. The negative stigma and perception that will be brought to our state, agricultural industry, tourist industry and other entities will impair further viable economic and cultural growth. This unprecedented facility will bring closures to our Hills Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies fail to disclose complete financial structures that would demonstrate a sound analysis for safe operations and long term stability necessary. The costs for emergency response training and technical operations to safe guard our citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy.

We demand that the Nuclear Regulatory Commission extend the comment period 6 months /or end the licensing process.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. **We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process.** (please print)

This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens living near the transportation corridors. This proposed facility and transportation routes will damage perceptions of Utah and create negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. This unprecedented facility could bring closures to Hill Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies fail to disclose complete financial structures that would demonstrate a sound analysis for safe operations and long-term stability. The costs for emergency response training and technical operations to safeguard our citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and as a solution for lack of a national nuclear waste policy.

We demand that the Nuclear Regulatory Commission extend the comment period to another minimum 6 months /or end the licensing process.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens living near the transportation corridors. This proposed facility and transportation routes will damage perceptions of Utah and create negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. This unprecedented facility could bring closures to Hill Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies fail to disclose complete financial structures that would demonstrate a sound analysis for safe operations and long-term stability. The costs for emergency response training and technical operations to safeguard our citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and as a solution for lack of a national nuclear waste policy.

We demand that the Nuclear Regulatory Commission extend the comment period to another minimum 6 months /or end the licensing process.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens living near the transportation corridors. This proposed facility and transportation routes will damage perceptions of Utah and create negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. This unprecedented facility could bring closures to Hill Air Force Base and necessary training operations for our national defense. The utility corporations and federal agencies fail to disclose complete financial structures that would demonstrate a sound analysis for safe operations and long-term stability. The costs for emergency response training and technical operations to safeguard our citizens can not be the responsibility of Utah. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and as a solution for lack of a national nuclear waste policy.

We demand that the Nuclear Regulatory Commission extend the comment period to another minimum 6 months /or end the licensing process.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

Senator Scott Howell

U.S. Rep. Wayne Owens

Executive Committee: Chairman: Jim McConkie; Brent D. Ward; Robert Bradley; Rocky Navarro/ Executive Director: Anne Sward Hansen

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

Please send petition to Citizens Against Radioactive Waste 4001 South 700 East Suite #115,
 Murray, Utah 87107 We will send it to our elected officials

Dear Citizens Against Radioactive Waste:

I am a seriously concerned resident of Utah in opposition to the Goshute Skull Valley Nuclear Waste Storage Facility. I got involved in this with the realization that I need to participate along with our esteemed representatives to try and help prevent this from happening—or at the least to demand that the Nuclear Regulatory Commission extend the public comment period for a minimum of 6 months. There were many residents of Morgan—who really knew very little facts concerning this serious issue—and many others who feel like they can not make a difference. That is when I wrote this following letter to the editor, and it was published in both local newspapers. There were 215 residents mostly from Morgan who stopped by to sign petitions within the last 2 weeks...there are more who are still wanting to sign, but we are out of time. Enclosed is a copy of the signed petitions, and the letter to the editor.

Sincerely,

A handwritten signature in cursive script that reads "Carolyn Hemingway". The signature is written in black ink and is positioned above the printed name.

Carolyn Hemingway

Letter to the editor in Morgan, Utah-September 1, 2000

I don't like admitting to the whole community that sometimes I hide my head in the sand on important issues that hit my panic button. Quite some time ago--I partially heard something about Utah being considered for the site of the nations nuclear waste storage facility somewhere out by Tooele. I dismissed the idea thinking that we had enough potential problems just with the nerve gas facility in our back yards (with a moderate wind)...and tried to optimistically assume Utah would never let this happen. Part of having my head buried means that I do not read the big city newspapers, and only occasionally--half way listen to the news. It helps this ostrich to be more positive about things. Last week a fax came to the real estate office where I work as an assistant office manager--about the nuclear waste issue. It sounded to me as if Governor Levitt's efforts along with the Citizens Against Radioactive Waste In Utah (honorary board members like Governor Norman Bangerter, Mayor Ted Wilson, etc...) were at a dead end and about out of time. What really got my attention was when I read that about 92% of all the nations nuclear waste is generated east of the Colorado River, and that one of the main routes by rail would be right through our beautiful little valley on the way to the Goshute Indian Reservation. There are numerous things that come to mind instantly...most of us live maybe a quarter mile at most from those tracks—what about derailment, how safe, etc... The biggest thing that bothers me is that it seems like the people that generate nuclear waste should be responsible for storing it, or consider other means of energy. The Citizens Against Radioactive Waste In Utah were asking any concerned Utah Citizens to get a voice with them in opposition to this, or at least to have more time to evaluate this sensitive issue. If anyone would like to sign a petition to let these independent energy companies know we are not in favor of this, and that we would like more answers to their plans—please look for a petition during the next few weeks at

different locations. There will be a petition at Nebco for anyone doing business there or passing by, also in the lobby of the post office, and at times there will be a table set up at the Jubilee market or petitions left on the bulletin boards. All comments and petitions have to be received by September 21st, and hopefully we can help make a difference. Thank you to a great community.

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)

By signing this petition I hereby declare that I oppose the opening of a nuclear waste storage facility on the Goshute Skull Valley Reservation. This facility will bring no benefit to the citizens of Utah. Based on the conclusions of the Utah Department of Environmental Quality review, I recognize the enormous and potential risks to our citizens. This proposed facility and transportation routes will create damage perception and negative stigma potentially causing devaluation of property, economic losses to our agricultural industry, tourist industry and other entities impairing further viable economic and cultural growth to our state. Utah will not tolerate being targeted as the enabler for our nation's toxic economy and solution for lack of a national nuclear waste policy. We demand that the Nuclear Regulatory Commission extend the comment period for a minimum 6 months /or end the licensing process. (please print)
