Dear Mr. Meyer -

As a concerned citizen and resident of Utah, I strongly encourage the U.S. Nuclear Regulatory Committee not proceed with allowing Private Fuel Storage (PFS) ship radioactive waste for "temporary" storage at the Skull Valley Goshute Reservation.

I believe the PFS proposal to be costly, dangerous and not necessary. Please carefully consider the serious ramifications such a proposal would create. For the safety of our citizens and the environment, please do not allow the PFS proposition to occur. Thank you.

Amy O'Connor
