

The U.S. Nuclear Regulatory Commission (NRC) invites your **(260)** comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

Section 4.7.

2. Please state your comment(s)?

I am a field health underwriter and President of Pro Benefits International Insurance Agency. I am strongly opposed to storing any of our nation's Spent Fuel on the Skull Valley Goshute Indian Reservation or anywhere else in this beautiful state.

From a health standpoint, the proposal is a clear 'no brainer.' The storage of lethally radioactive nuclear waste, waste that is known to stay lethal AND radioactive for thousands of years, just minutes away from a bombing range and about two million concerned Utahans.....is nothing short of INSANITY.

Most homeowner and health insurance coverage EXCLUDES compensation for nuclear accidents. Who is left with the bill? And who is going to pay the irreversible health consequences for generations to come?

The insidious will make a case of it, but it is a FALSE case. And they know it is a false case.

IT MUST NOT HAPPEN!
