

October 5, 2000

Mr. Robert Zoon, Chief  
Radiation Safety Branch  
Division of Safety  
Office of Research Services  
National Institutes of Health  
Bethesda, MD 20892

Dear Mr. Zoon:

The Risk Task Group (RTG) would like to extend our sincere thanks to you and the members of your staff for your hospitality on our recent visit to the National Institutes of Health. We would especially like to thank John Jacobus for serving as our guide. The tour was very informative, and we all gained additional insights into radiopharmacy, diagnostic imaging, teletherapy, and the production of isotopes using accelerators.

We feel that visiting a variety of sites which use byproduct material is essential to our work, and we appreciate your help in reaching our goal.

Sincerely

Lawrence E. Kokajko, Section Chief  
Risk Task Group  
Office of Nuclear Material Safety  
and Safeguards
