

October 5, 2000

Captain James W. Malinoski  
Radiation Sciences Department  
Armed Forces Radiobiology Research Institute  
8901 Wisconsin Avenue  
Bethesda, MD 20889-5603

Dear Captain Malinoski:

The Risk Task Group (RTG) would like to extend our sincere thanks to you and the members of your staff for your hospitality on our recent visit to the Armed Forces Radiobiology Research Institute. The tour was very informative, and we all gained additional insights into the operation of your TRIGA reactor, and cobalt-60 irradiator facility. We especially enjoyed the reactor pulse, and the demonstration of the irradiator operation and safety features.

We feel that visiting a variety of sites which use byproduct material is essential to our work, and we appreciate your help in reaching our goal.

Sincerely

Lawrence E. Kokajko, Section Chief  
Risk Task Group  
Office of Nuclear Material Safety  
and Safeguards
