RE: Advisement of missing PO.210 Source

Dear Mr. Wright:

My name is Lonnie Ekeren from Mid America Peterbilt and we lost a PO-210 Static Elimination Device on or around September 25, 2000. We believe it was thrown away in the trash. The serial number of the unit is 9807KB; the model number is PDV1420. As of today it would have approximately 2.2 mCi of PO-210. It was manufactured in December 1999.

Please contact me if you have any questions or wish more detail regarding this issue.

Sincerely,

A handwritten signature in black ink, appearing to read "Lonnie Ekeren".

Lonnie Ekeren
