Mr. Douglas A. Brown
ASME NQA Main Committee
67 Castle Coombe Ct.
Bourbonnais, IL 60914-1648

Dear Mr. Brown,

I wish to nominate Mr. Larry L. Campbell to replace Ms. Suzanne C. Black as the authorized U.S. Nuclear Regulatory Commission (NRC) representative on the ASME Committee on Nuclear Quality Assurance. Mr. Campbell is responsible for overseeing the quality assurance program for the proposed high-level waste repository at Yucca Mountain, Nevada, in the Division of Waste Management of the Office of Nuclear Material Safety and Safeguards. Mr. Campbell will continue to serve as the authorized NRC representative on the ASME NQA-1 Subcommittee on Program Management Processes.

In accordance with Office of Management and Budget Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," February 19, 1998, the participation on a committee by an authorized representative does not connote agency agreement with, or endorsement of, decisions reached by the committee's efforts. Agency representatives participating on standards developing groups will, to the extent possible, ascertain the views of the agency on matters of interest and will express views that are consistent with established agency views.

Correspondence should be addressed to:
