DCS-NRC-000022
Response Required: Yes
Response Due: 29 September 2000

SUBJECT: Docket Number 070-03098
Duke Cogema Stone & Webster
Mixed Oxide (MOX) Fuel Fabrication Facility
Office Space for NRC Inspector

REFERENCE: 10 CFR 70.55(c)(1) & (2)

Dear Mr. Persinko:

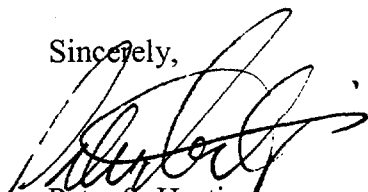

The cited regulation states that "upon request by the Director, Office of Nuclear Material Safety and Safeguards or the appropriate NRC Regional Administrator," DCS shall provide office space for NRC inspectors. The regulation provides guidance concerning that office space, and states that the office space provided shall be subject to NRC approval.

Attached are copies of the current conceptual arrangement of the MOX Fuel Fabrication Facility Administration Building upper level (showing the location of the NRC office space) and the current Proposed Site Plan (showing the location of the Administration Building). We conceptually have designated two offices and a conference room for the NRC.

We would like to get an indication that the type of office space we have set aside for the NRC is sufficient, but this level of detail will not be included in the Construction Authorization Request. Accordingly, please review the attached sketches and provide your concurrence by 29 September 2000.

Please call me at (704) 373-7820 if you have any questions on the attached.

Sincerely,

Peter S. Hastings
Licensing Manager
