December 22, 2000

SUBJECT: CLINTON POWER STATION, UNIT 1 - REQUEST FOR WITHHOLDING
INFORMATION FROM PUBLIC DISCLOSURE (TAC NO. MA9608)

Dear Mr. Reandeau:

By your application dated July 27, 2000, as supplemented October 5, 2000, and Global Nuclear Fuel's (GNF) affidavits executed by Glen A. Watford dated July 10, 2000, and Charles M. Vaughan dated October 2, 2000, you submitted proprietary documents entitled, "Additional Information Regarding the Cycle Specific SLMCPR for Clinton Unit 1 Cycle 8" and "Clinton Cycle 8 Safety Limit MCPR Responses to USNRC Questions," and you requested that they be withheld from public disclosure pursuant to 10 CFR 2.790(a)(4). Also, non-proprietary versions of these documents have been placed in the Nuclear Regulatory Commission (NRC) Public Document Room (PDR) and added to the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room (PERR) located on the NRC internet website at www.nrc.gov.

GNF affidavits stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies;
- b. Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

The NRC staff has reviewed your application, as supplemented, and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the versions of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-3027.

Sincerely,

/RA/

Jon B. Hopkins, Senior Project Manager, Section 2
Project Directorate III
Division of Licensing Project Management
Office of Nuclear Reactor Regulation
