Subject: Comments Concerning Draft Regulatory Guide 1100, "Design Guidance for Radioactive Waste Management Systems, Structures, and Components Installed in Light-Water-Cooled Nuclear Power Plants," (65FR55064, dated September 12, 2000)

Dear Sir/Madam:

This letter is being submitted in response to the NRC's request for comments concerning Draft Regulatory Guide 1100 (DG-1100), "Design Guidance for Radioactive Waste Management Systems, Structures, and Components Installed in Light-Water-Cooled Nuclear Power Plants," which was published in the Federal Register (reference 65FR55064, dated September 12, 2000). The NRC developed this guide to propose guidance on methods acceptable to the NRC staff for complying with the NRC's regulations on the design, construction, installation, and testing of radioactive waste management facilities, and the structures, systems, and components in light-water-reactor nuclear power plants.

PECO Energy Company appreciates the opportunity to comment on DG-1100 and supports the comments submitted on behalf of the nuclear energy industry, by the Nuclear Energy Institute.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

James A. Hutton, Jr.
Director- Licensing
