U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

In regard to our NRC License No. 12-00140-04, I believe reference to Carbon-14 may have been inadvertently omitted from Condition 14 of the license. Line 3 of condition 14 should read "containing Hydrogen 3 and Carbon 14" since Carbon-14 was also requested in the specific license request beginning on page one of the attachments to our June 9, 1982, license renewal request.

The omission may have been contributed to by our apparently inadvertently omitting from page one of the attachments the lines

"1. Introduction of Hydrogen-3 and Carbon-14 compounds into gasoline and heating oil, including such products as jet fuel, diesel, No. 1 heating oil, No. 2 heating oil, and No. 6 heating oil."

which should have followed the lines

"In accordance with Section 32.11, a specific license is requested for the following:".

Attached is a copy of the page as submitted and a copy of the full specific license request 1., which resulted in Condition 14, as I believe it was intended to be presented.

I would like to have our license corrected or amended so that we have the specific license to use Carbon-14 as requested in our renewal application.

Yours very truly,

ARCO Petroleum Products Company

John D. Phelps, Jr.
Radiation Safety Officer
