

ATLANTIC RICHFIELD

HARVEY, Tex

7-7-70

Met with Dr. Snow

Ex. 6

1-1-60 to 3-31-70 for 100 men

7 months

Ex. 6

for quarter 20 men.

20 bridge now reserved, not all assigned

R.S. behavior falls bridge, bin-walking & 13 with

DEC-5 high

Committee

now only three Committee members

Snow, Billie & G.H.

All questions are then Dr. Snow.

All requests to reviewing are brought to office of Snow.

George Macdonald, page of Brown Rev. is Snow's signature

All engine test work has been discontinued -

BJH

Most of the work without preparation of track and Harvey and

(2)

transport to field location where experimental work is done
by the three committee personnel.

Today 5/23 was the last large preparation of H^3 compound
& unirradiation was made.

H^3 compounds & their solutions all are stored in hood which
runs at all times.

N - building

Co^{60} work is at a standstill at present but facility
is still available for use.

3 - Se^{75} sources were shipped 9-23-69 30mc
to Atomic Disposal Co. - No other waste shipped since last
inspection.

1st leak test 6-24-70 all $< 2 \times 10^{-5}$ μ ci.

2 - Co^{137} sealed sources were (300mc ea.)

1 - Co^{137} " " 10mc

Leak test 3 times each year

Also 3 times a year source survey of Radio lab shows
 $\approx 5 \times 10^{-5}$ μ ci activity
