

January 23, 2001

Mr. Norm Cohen
Coordinator, UNPLUG Salem Campaign
Coalition for Peace and Justice
321 Barr Avenue
Linwood, NJ 08221

Dear Mr. Cohen:

In a November 24, 2000, letter to Chairman Meserve, you requested that the U.S. Nuclear Regulatory Commission immediately release all results of its recent inspection of the steam generators at the Salem Nuclear Generating Station, Unit No. 2 (Salem), to the public by means of a public meeting at Artificial Island. We had hoped to provide a response to your letter as of this date; however, we have just received a copy of your January 6, 2001, letter to Chairman Meserve regarding similar issues at Salem. The most recent letter raises additional concerns, as well as reiterates your call for a public meeting pertaining to steam generators.

The Office of Nuclear Reactor Regulation has been given the responsibility to respond to your concerns. Since the two letters touch on many of the same subjects, we would like to provide a single, comprehensive response to you which addresses the many issues you have raised. We regret the delay in replying to you; however, I trust that this approach will be acceptable. If you have any additional questions or need further information, please do not hesitate to contact me at (301) 415-1353.

Sincerely,

/RA/

Elinor G. Adensam, Director
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-272 and 50-311
