Dear Sir:

This letter is to inform you as well as put on record, my opposition of the proposal to store high level nuclear waste on the Skull Valley Indian Reservation in Toole County, Utah. I do not belong to any organizations, groups and/or industry relating to this field, or environmental agencies. I am just a concerned citizen/parent who feels with all of the evidence written and oral, this is just an extremely bad idea. Especially due to the fact that it is possible that we could have seismic activity in that area. Therefore, I join with the Governor of Utah, Utah State Geologists and the Department of Environmental Quality in opposing this potential proposition. I am confident that when all parties concerned, including the NRC, review and study all of the facts that include potential hazards, health risks and environmental concerns, will make the right decision and join the opposition on this proposal.

Sincerely,

Donald J. Ravas
