Washington, D. C. 20555
Re Docket # 72-22

Dear Sir:
The transportation challenge is to
to clean up their own messes, not
to dump them in their neighbors
lapse. This lesson, sadly, was
forgotten by the time they became
adults.

Storage of nuclear waste
should be the responsibility of the
entity that produced it, and not
planned for, not just conveniently
passed on to their neighbors.
California should leave that
waste where it is, or use its
own deserts, not ours.

Sincerely,
Sae Picklesimer
