

Received 06/98

To: E. Shum,

I am writing to express my opinion on the proposed nuclear storage facility in the Skull Valley Indian reservation. I feel that of the approximately thirty Goshutes living on the actual site of the proposed facility need support in their opposition to the facility. If they are not a majority of the vote of the 120 Goshutes on the reservation, then they will not have much say in the final decision. I think they should have all the say because they are the ones who have to live with the negative effects of the nuclear waste.

Other than the fact that the inhabitants of the area are opposed to the facility, there are also many things that could happen to the animal and plant life in the area including the 14 raptor species in Skull Valley.

These are just a few of the reasons why I am opposed to the proposed nuclear fuel storage site.
