The Hon. Shirley Jackson
Chair,
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Dear Commissioner Jackson:

I have been reading about the nuclear waste problem involving the Goshute land in Skull Valley, Utah. In my research on nuclear waste, I have questioned if we are storing it properly and if there are alternatives to nuclear dumping. Since my home is in Utah, this storage of nuclear waste in my state concerns me. Do we (residents) need to worry about this in our area. I have also been hearing that the Goshute Indian reservation is a sovereign nation. Is this a viable issue? I would like to obtain more information about this subject to further my study. Any packets, pamphlets, or statistics you have regarding this subject would be greatly appreciated.

Sincerely,

Sarah Burtenshaw
