COMMITMENT RESOLUTION LETTER #9
DOCKET NO. 72-22/TAC NO. L22462
PRIVATE FUEL STORAGE FACILITY
PRIVATE FUEL STORAGE L.L.C.

In our phone call this afternoon, the NRC requested two items to clarify materials previously sent to the NRC: a map showing airways in the vicinity of the Private Fuel Storage Facility (PFSF), and the source of information regarding the flight path of F-16s traversing Skull Valley.

Response 1: PFS is providing a map showing the airways in the vicinity of the site to enable one to visualize where the airways, described in General Cole's June 3, 1999 "Risk Assessment of Credible Aircraft or Missile Accidents Impacting [the PFSF]," are located vis-à-vis the PFSF site. The map is from a 1996 Quantitative Risk Assessment for the Tooele Chemical Agent Disposal Facility (denominated as the "Plant" on the map, but which is not the PFSF) prepared by Science Applications International Corporation for the U.S. Army. We have added to the left side of the map the location of the PFSF site and airway IR 420.

Response 2: PFS is providing a revised page 10 to General Cole's June 3, 1999 report which adds a footnote at the end of the second sentence of the last paragraph on the page providing the source of the F-16 flight path distance information (five miles from the PFSF) and other information in the sentence, and revised pages 30 and 31, which include the new footnote 15A (which is the same as footnote 17).

We trust this letter and the attachments provide the NRC with the information requested in our telephone call this afternoon. If you have any questions regarding this response, please contact me at 303-741-7009.

Sincerely,

A handwritten signature in black ink, appearing to read "John L. Donnell". The signature is fluid and cursive, with the first name "John" being more prominent.

John L. Donnell
Project Director
Private Fuel Storage L.L.C.
