U. S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555-0001

**Subject: Beaver Valley Power Station, Unit No. 1 and No. 2  
BV-1 Docket No. 50-334, License No. DPR-66  
BV-2 Docket No. 50-412, License No. NPF-73  
Response to Regulatory Issue Summary 2000-20**

The Nuclear Regulatory Commission (NRC) issued Regulatory Issue Summary 2000-20 to inform addressees about the importance of providing the NRC with advance notice of their plans for license renewal so that the NRC staff can better plan and budget for the processing of renewal applications. This letter is provided as advance notification that FENOC plans to pursue license renewal for both BVPS units. It is anticipated that these submittals would be made around September 2004. This date is consistent with the information provided to the staff in a meeting on the Beaver Valley Full Potential Program in White Flint on August 8, 2000. At the meeting, it was identified that a license renewal application was tentatively planned for year 2004.

This submittal does not contain proprietary information. Any questions pertaining to this subject may be directed to Mr. Thomas S. Cosgrove, Manager, Regulatory Affairs at 724-682-5203.

Sincerely,

  
Lew W. Myers
