U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Oyster Creek Generating Station
Facility License No. DPR-16
Docket No. 50-219
Notification of Project Completion – ThermoLag 330-1 Fire Barriers

- References: 1) Correspondence No. 1940-98-20245 dated May 11, 1998, "Consent to Confirmatory Order Modifying License No. DPR-16"
- 2) NRC Letter dated May 22, 1998, "Confirmatory Order Modifying License No. DPR-16, Oyster Creek Nuclear Generating Station"
- 3) NRC Letter dated October 1, 1998, "Completion of Licensing Action for Generic Letter 92-08, 'Thermo-Lag 330-1 Fire Barriers,' dated December 17, 1992, for Oyster Creek Nuclear Generating Station (TAC No. M85581)"

The purpose of this letter is to notify the NRC that modifications to correct Thermo-Lag deficiencies, as committed in Reference 1 and ordered by NRC in Reference 2, were completed during the recent refueling outage (18R). All work package documentation was complete by December 31, 2000 as committed in References 1 and 2. This notification satisfies the Generic Letter No. 92-08 reporting requirement for completion of corrective action as reiterated in Reference 3.

Documentation has been retained and is available for NRC audit or inspection regarding the resolution of Thermo-Lag 330-1 fire barrier system concerns. As suggested in Reference 3, the ampacity impact of previously installed Thermo-Lag material on cable life of safety-related circuits has been considered.
