

NRC Regulatory Agenda

**Semiannual Report
July - December 2000**

**U.S. Nuclear Regulatory Commission
Office of Administration
Washington, DC 20555-0001**

AVAILABILITY OF REFERENCE MATERIALS IN NRC PUBLICATIONS

NRC Reference Material

As of November 1999, you may electronically access NUREG-series publications and other NRC records at NRC's Public Electronic Reading Room at www.nrc.gov/NRC/ADAMS/index.html.

Publicly released records include, to name a few, NUREG-series publications; *Federal Register* notices; applicant, licensee, and vendor documents and correspondence; NRC correspondence and internal memoranda; bulletins and information notices; inspection and investigative reports; licensee event reports; and Commission papers and their attachments.

NRC publications in the NUREG series, NRC regulations, and *Title 10, Energy*, in the Code of *Federal Regulations* may also be purchased from one of these two sources.

1. The Superintendent of Documents
U.S. Government Printing Office
Mail Stop SSOP
Washington, DC 20402-0001
Internet: bookstore.gpo.gov
Telephone: 202-512-1800
Fax: 202-512-2250
2. The National Technical Information Service
Springfield, VA 22161-0002
www.ntis.gov
1-800-553-6847 or, locally, 703-605-6000

A single copy of each NRC draft report for comment is available free, to the extent of supply, upon written request as follows:

Address: Office of the Chief Information Officer,
Reproduction and Distribution
Services Section
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001
E-mail: DISTRIBUTION@nrc.gov
Facsimile: 301-415-2289

Some publications in the NUREG series that are posted at NRC's Web site address www.nrc.gov/NRC/NUREGS/indexnum.html are updated periodically and may differ from the last printed version. Although references to material found on a Web site bear the date the material was accessed, the material available on the date cited may subsequently be removed from the site.

Non-NRC Reference Material

Documents available from public and special technical libraries include all open literature items, such as books, journal articles, and transactions, *Federal Register* notices, Federal and State legislation, and congressional reports. Such documents as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings may be purchased from their sponsoring organization.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at—

The NRC Technical Library
Two White Flint North
11545 Rockville Pike
Rockville, MD 20852-2738

These standards are available in the library for reference use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from—

American National Standards Institute
11 West 42nd Street
New York, NY 10036-8002
www.ansi.org
212-642-4900

Legally binding regulatory requirements are stated only in laws; NRC regulations; licenses, including technical specifications; or orders, not in NUREG-series publications. The views expressed in contractor-prepared publications in this series are not necessarily those of the NRC.

The NUREG series comprises (1) technical and administrative reports and books prepared by the staff (NUREG-XXXX) or agency contractors (NUREG/CR-XXXX), (2) proceedings of conferences (NUREG/CP-XXXX), (3) reports resulting from international agreements (NUREG/IA-XXXX), (4) brochures (NUREG/BR-XXXX), and (5) compilations of legal decisions and orders of the Commission and Atomic and Safety Licensing Boards and of Directors' decisions under Section 2.206 of NRC's regulations (NUREG-0750).

NRC Regulatory Agenda

Semiannual Report July - December 2000

Manuscript Completed: February 2001
Date Published: February 2001

**Division of Administrative Services

U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001**

Preface

The Regulatory Agenda is a semiannual compilation of all rules on which the NRC has recently completed action, or has proposed action, or is considering action, and of all petitions for rulemaking that the NRC has received that are pending disposition.

Organization of the Agenda

The agenda consists of two sections that have been updated through December 31, 2000. Section I, "Rules," includes (A) rules on which final action has been taken since June 30, 2000, the closing date of the last NRC Regulatory Agenda; (B) rules published previously as proposed rules on which the Commission has not taken final action; (C) rules published as advance notices of proposed rulemaking for which neither a proposed nor final rule has been issued; and (D) unpublished rules on which the NRC expects to take action.

Section II, "Petitions for Rulemaking," includes (A) petitions denied or incorporated into final rules since June 30, 2000; (B) petitions incorporated into published proposed rules; (C) petitions incorporated into unpublished rules; and (D) petitions pending staff review.

In Section I of the agenda, the rules are ordered from the lowest to the highest part within Title 10, Chapter I, of the Code of Federal Regulations (Title 10). If more than one rule appears under the same part, the rules are arranged within that part by date of most recent publication. If a rule amends multiple parts, the rule is listed under the lowest affected part. In Section II of the agenda, the petitions are ordered from the lowest to the highest part of Title 10 and are identified with a petition for rulemaking (PRM) number. If more than one petition appears under the same CFR part, the petitions are arranged by PRM numbers in consecutive order within that part of Title 10.

A Regulation Identifier Number (RIN) has been added to each rulemaking agenda entry. This identification number will make it easier for the public and agency officials to track the publication history of regulatory actions. The dates listed under the heading "Timetable" for scheduled action by the Commission, the Executive Director for Operations (EDO), or the Chief Financial Officer (CFO) on particular rules or petitions are considered tentative and are not binding on the Commission or its staff. They are included for planning purposes only. This Regulatory Agenda is published to provide the public early notice and opportunity to participate in the rulemaking process. However, the NRC may consider or act on any rulemaking proceeding even if it is not included in this Regulatory Agenda. Conversely, the inclusion in this Regulatory Agenda of unpublished rules on which the NRC is considering action does not commit the NRC to publishing the rule for public comment in the Federal Register.

Rulemakings Approved by the Executive Director for Operations (EDO)

The Executive Director for Operations initiated a procedure for the review of the regulations being prepared by staff offices that report to him to ensure that staff resources were being allocated to achieve NRC's regulatory priorities most effectively. This procedure requires EDO approval before staff resources may be expended on the development of any new rulemaking.

Those unpublished rules whose further development has been terminated will be noted in this edition of the agenda and deleted from subsequent editions. Rules whose termination was directed subsequent to publication of a notice of proposed rulemaking or an advance notice of proposed rulemaking will be removed from the agenda after publication of a notice of withdrawal in the Federal Register. Rules and Petitions for Rulemaking that appear in the agenda for the first time are identified by an asterisk (*).

Public Participation in Rulemaking

Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Attention: Rulemakings and Adjudications Staff, Washington, DC 20555-0001.

Comments may also be hand delivered to One White Flint North, 11555 Rockville Pike, Rockville, Maryland, between 7:30 a.m. and 4:15 p.m., Federal workdays. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

You may also provide comments via the NRC's interactive rulemaking website (<http://ruleforum.llnl.gov>). This site provides the capability to upload comments as files (any format), if your web browser supports that function. For information about the interactive rulemaking website, contact Ms. Carol Gallagher, 301-415-5905 (e-mail: cag@nrc.gov).

The agenda and any comments received on any rule listed in the agenda are available for public inspection, and copying for a fee, at the Nuclear Regulatory Commission's Public Document Room, One White Flint North, 11555 Rockville Pike, Room 01-F15, Rockville, MD, between 7:45 a.m. and 4:15 p.m., Federal workdays.

Additional Rulemaking Information

For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Betty K. Golden, Regulations Specialist, Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001,

Telephone 301-415-6863 (persons outside the Washington, DC, metropolitan area may call toll-free: 800-368-5642), or e-mail bkg2@nrc.gov. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading "Agency Contact" for that rule.

Preface	iii
I. Rules	
(A) Final Rules	
1. Relocation of NRC's Public Document Room; Minor Changes (Parts 1, 2, 7, 9, 15, 19, 20, 21, 30, 35, 40, 50, 51, 53, 55, 60, 61, 70, 71, 72, 73, 74, 75, 81, 100, 110, 140, 150, 170 and 171)	1
2. Adjustment of Civil Penalties for Inflation (Parts 1, 2, and 13)	1
3. Revision of References to Section 202 of the Energy Reorganization Act (Parts 1, 2, 19, 20, 30, 40, 50, 51, and 70)	2
4. Antitrust Review Authority: Clarification (Parts 2 and 50)	2
5. Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving Federal Financial Assistance (Part 5)	3
6. Requirements for Certain Generally Licensed Industrial Devices Containing Byproduct Material (Parts 30, 31, and 32)	3
7. New Dosimetry Technology (Parts 34, 36, and 39)	4
8. Quality Assurance Program Changes (Part 50)	4
9. Reporting Requirements for Nuclear Power Reactors and Independent Spent Fuel Storage Installations at Power Reactor Sites (Parts 50 and 72)	5
10. Domestic Licensing of Special Nuclear Material (Part 70)	5
11. Clarifications and Addition of Flexibility (Part 72)	6
12. List of Approved Spent Fuel Storage Casks: Addition of the Holtec HI-STAR 100 Cask (Part 72)	6
13. List of Approved Spent Fuel Storage Casks: Addition of the NAC - UMS Cask (Part 72)	7
14. List of Approved Spent Fuel Storage Casks: TN-32 Revision* (Part 72)	7

CONTENTS

(A) Final Rules (con't)

- 15. List of Approved Spent Fuel Storage Casks: Revision of the NAC - UMS Cask (Part 72) 8
- 16. Export and Import of Nuclear Equipment and Materials (Part 110) 9
- 17. Criteria for an Extraordinary Nuclear Occurrence (Part 140) 9

(B) Proposed Rules

- 18. Availability of Official Records (Part 2) 11
- 19. Licensing Proceedings for the Receipt of High-Level Radioactive Waste at a Geologic Repository: Licensing Support Network, Design Standards for Participating Websites* (Part 2) 11
- 20. Nondiscrimination on the Basis of Race, Color, or National Origin in Programs or Activities Receiving Federal Financial Assistance; Nondiscrimination on the Basis of Handicap in Programs or Activities Receiving Federal Final Assistance Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance (Part 4) 12
- 21. Fitness-for-Duty Programs (Part 26) 12
- 22. Medical Uses of Byproduct Material (Part 35) 13
- 23. 120-Month ISI/IST Update Requirement (Part 50) 13
- 24. Use of Potassium Iodide (KI) by the General Public After a Severe Accident at a Nuclear Power Plant (Part 50) 14
- 25. Update Fuel Performance Considerations and Other Fuel Cycle Issues (Part 51) 14
- 26. Use of Simulators in Operator Licensing and Conforming Changes (Part 55) 15
- 27. Disposal of High-Level Radioactive Waste in a Proposed Geologic Repository at Yucca Mountain, Nevada (Part 63) 15

CONTENTS

(B) Proposed Rules (con't)

- 28. Storage of Greater Than Class C Waste (Part 72) 16
- 29. List of Approved Spent Fuel Storage Casks: Addition of the Fuel
Solutions Cask (Part 72) 17

(C) Advance Notices of Proposed Rulemaking

- 30. Disposal by Release into Sanitary Sewerage (Part 20) 19
- 31. Risk-Informing Special Treatment Requirements (Parts 21, 50, 54,
and 100) 19
- 32. Advance Notification to Native American Tribes of Transportation of
Certain Types of Nuclear Waste (Parts 71 and 73) 20

(D) Unpublished Rules

- 33. Changes to Adjudicatory Process (Part 2) 21
- 34. Submission of Documents Electronically; Minor Corrections (Parts 2, 4,
9, 15, 19 - 21, 25, 26, 30 - 32, 34, 40, 50, 51, 55, 60 - 62, 70 - 76, 81,
95, 110, 140, and 150) 21
- 35. Release of Part of a Reactor Facility or Site for Unrestricted Use Before
Receiving Approval of the License Termination Plan (Parts 2, 20,
and 50) 22
- 36. Nondiscrimination on the Basis of Sex in Education Programs or Activities
Receiving Federal Financial Assistance (Part 5) 23
- 37. Protection Against Discrete Radioactive Particles (DRPs) - A Unified
Skin Dose Limit (Part 20) 23
- 38. Reduction in the Scope of Random Fitness-for-Duty Testing Requirements
for Nuclear Power Reactor Licensees (Part 26) 24
- 39. Transfers of Source Material from Licensees to Exempt Persons*
(Part 40) 24

CONTENTS

(D) Unpublished Rules (con't)

40.	Codes and Standards (Part 50)	25
41.	Integrated Rulemaking for Decommissioning Nuclear Power Reactors (Part 50)	25
42.	Performance-Based, Risk-Informed Fire Protection (Part 50)	26
43.	Decommissioning Trust Provisions (Part 50)	27
44.	Material Control and Accounting* (Parts 51, 61, 70, 72, 73, 74, 75, 76, and 150)	27
45.	Lessons Learned from Design Certification (Part 52)	28
46.	Compatibility with IAEA Transportation Safety Standards* (Part 71)	28
47.	Geological and Seismological Characteristics of Spent Fuel Storage Systems (Part 72)	29
48.	List of Approved Spent Fuel Storage Casks: VSC-24 Storage Casks, Amendment 3 (Part 72)	29
49.	List of Approved Spent Fuel Storage Casks: FuelSolutions Revision * (Part 72)	30
50.	List of Approved Spent Fuel Storage Casks: HI-STAR 100 Cask System, Amendment 2* (Part 72)	30
51.	Re-evaluation of Power Reactor Physical Protection Regulations and Position on a Definition of Radiological Sabotage (Part 73)	31
52.	Termination of Section 274i Agreement Between the State of Louisiana and the NRC (Part 150)	31
53.	Revision of Fee Schedules; Fee Recovery, FY 2001* (Parts 170 and 171)	32

CONTENTS

II. Petitions for Rulemaking

(A) Petitions Incorporated Into Final Rules or Petitions Denied

1. Nuclear Energy Institute (PRM-50-62) 33
2. Atlantic City Electric Company, Austin Energy, Central Maine Power Company, Delmarva Power & Light Company, South Mississippi Electric Power Association, and Washington Electric Cooperative, Inc. (PRM-50-64) 33
3. Nuclear Energy Institute (PRM-70-7) 34
4. Public Citizen Litigation Group and Critical Mass Energy Project (PRM-140-1) 34

(B) Petitions Incorporated Into Published Proposed Rules

5. Northeast Ohio Regional Sewer District (PRM-20-22) 35
6. University of Cincinnati (PRM-20-24) 35
7. Virginia Electric and Power Company (PRM-26-1) 36
8. Peter G. Crane (PRM-50-63 and PRM-50-63A) 36
9. States of Nevada and Minnesota (PRM-60-2/2A) 37
10. Portland General Electric Company (PRM-72-2) 37

(C) Petitions Incorporated Into Unpublished Rules

11. Amersham Corporation (PRM-34-5) 39
12. State of Colorado and Organization of Agreement States (PRM-40-27) 39
13. Donald A. Barbour, Philotechnics (PRM-40-28) 40
14. North Carolina Public Staff Utility Commission (PR-50-57) 40

CONTENTS

(C) Petitions Incorporated Into Unpublished Rules (con't)

15. New England Coalition on Nuclear Pollution (PRM-51-1) 41
16. International Energy Consultants (PRM-71-12) 41

(D) Petitions Pending Staff Review

17. Michael Stein (PRM-2-12) 43
18. Ohio Citizens for Responsible Energy, Inc. (PRM-9-2) 43

34. United Plant Guard Workers of America (PRM-76-1) 51

I-RULES

A

(A) Final Rules

1. **Relocation of NRC's Public Document Room; Minor Changes (Parts 1, 2, 7, 9, 15, 19, 20, 21, 30, 35, 40, 50, 51, 53, 55, 60, 61, 70, 71, 72, 73, 74, 75, 81, 100, 110, 140, 150, 170 and 171)**

RIN: 3150-AG46

Abstract. The final rule amends the Commission's regulations to reflect the relocation of the NRC's Public Document Room from Washington, DC, to the NRC Headquarters offices in Rockville, Maryland. This amendment is necessary to inform NRC licensees and members of the public of this relocation.

Timetable: Final Rule Published 09/11/00 65 FR 54865
Final Rule Effective 09/26/00

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Thomas E. Smith, Office of the Chief Information Officer,
(301) 415-7204, e-mail tes@nrc.gov

2. **Adjustment of Civil Penalties for Inflation (Parts 1, 2, and 13)**

RIN: 3150-AG59

Abstract. The final rule amends the Commission's regulations to adjust its maximum Civil Monetary Penalties (CMP) that may be imposed by the NRC. The Federal Civil Penalties Inflation Adjustment Act requires every agency to adjust its CMP at least once every 4 years to account for inflation. The provision for the maximum CMP for a violation of the Atomic Energy Act for any regulation or order issued thereunder is adjusted from \$110,000 to \$120,000 per violation per day. The provisions concerning program fraud civil penalties will be amended by adjusting the maximum civil penalties under the Program Fraud Civil Remedies Act from \$5,500 to \$6,000 for each false claim or statement. This rulemaking also amends the designation of "reviewing official" for the purposes of the Program Fraud Civil Remedies Act to reflect a reorganization in the NRC's Office of the General Counsel.

Timetable: Final Rule Published 10/04/00 65 FR 59270
Final Rule Effective 11/03/00

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Norman St. Amour, Office of the General Counsel,
(301) 415-1589, e-mail nxs1@nrc.gov

**3. Revision of References to Section 202 of the Energy Reorganization Act
(Parts 1, 2, 19, 20, 30, 40, 50, 51, and 70)**

RIN: 3150-AG53

Abstract. The final rule makes a number of conforming changes to the Commission's regulations that reference Section 202 of the Energy Reorganization Act. The final rule is necessary to remove the text of the footnotes that reference Section 202 to standardize all references in the regulations to read consistently as Section 202. This final rule also corrects a typographical error in Part 19, makes other minor administrative changes to conform Part 51 to other parts of this chapter, and reflects the abolishment of the Office for Analysis and Evaluation of Operational Data.

Timetable: Final Rule Published 09/12/00 65 FR 54948
Final Rule Effective 09/12/00

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Alzonía W. Shepard, Office of Administration,
(301) 415-6864, e-mail aws1@nrc.gov

4. Antitrust Review Authority: Clarification (Parts 2 and 50)

RIN: 3150-AG38

Abstract. The final rule amends the Commission's regulations to reflect more clearly its limited antitrust review authority by explicitly limiting the types of applications that must include antitrust information. Specifically, because the Commission is not authorized to conduct antitrust reviews of post-operating license transfer applications, or at least is not required to conduct this type of review and has decided that it no longer will conduct them, no antitrust information is required as part of a post-operating license transfer application. This rulemaking brings the regulations into conformance with the Commission's limited statutory authority to conduct antitrust reviews.

Timetable: Final Rule Published 07/19/00 65 FR 44649
Final Rule Effective 08/18/00

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Jack R. Goldberg, Office of the General Counsel,
(301) 415-1681, e-mail jrg1@nrc.gov

5. Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving Federal Financial Assistance (Part 5)

RIN: 3150-AG43

Abstract. The final rule provides for the enforcement of Title IX of the Education Amendments of 1972, as amended (20 USC 1681, et seq.) (Title IX), as it applies to educational programs and activities that receive Federal financial assistance from certain Federal Government agencies. Title IX prohibits discrimination based on sex in education programs or activities that receive Federal financial assistance. The rulemaking provides guidance to recipients of Federal financial assistance who administer education programs or activities.

Timetable: Final Rule Published 08/30/00 65 FR 52858
Final Rule Effective 09/29/00

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Marva C. Gary, Office of Small Business and Civil Rights,
(301) 415-7382, e-mail mcg@nrc.gov

6. Requirements for Certain Generally Licensed Industrial Devices Containing Byproduct Material (Parts 30, 31, and 32)

RIN: 3150-AG03

Abstract. The final rule amends the Commission's regulations for certain industrial devices containing byproduct material to include more specific provisions for a registration and accounting program including associated fees and modification of the quarterly transfer reporting requirements for manufacturers and initial distributors of these industrial devices. The final rule also modifies the reporting, recordkeeping, and labeling requirements for specific licensees who distribute these generally licensed devices. The final rule is intended to improve NRC's ability to track certain general licensees and the devices they possess, and to ensure that general licensees are aware of and understand the requirements for the possession of devices containing byproduct material.

Timetable: Final Rule Published 12/18/00 65 FR 79162
Final Rule Effective 02/16/01

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. Yes

Agency Contact: Catherine R. Mattsen, Office of Nuclear Material Safety and Safeguards,
(301) 415-6264, e-mail crm@nrc.gov

7. New Dosimetry Technology (Parts 34, 36, and 39)

RIN: 3150-AG21

Abstract: The final rule amends the Commission's regulations to allow licensees to use any type of personnel dosimeter that requires processing to determine the radiation dose, provided that the processor of the dosimeter is accredited to process this type of dosimeter under the National Voluntary Laboratory Accreditation Program, operated by the National Institute of Standards and Technology.

Timetable: Direct Final Rule Published 10/24/00 65 FR 63750
Direct Final Rule Effective 01/08/01

Legal Authority: 42 USC 2201; 42 USC 5841; 42 USC 2073; 42 USC 2111

Effects on Small Business and Other Entities: None

Agency Contact: Betty Ann Torres, Office of Nuclear Material Safety and Standards,
(301) 415-0191, e-mail bat@nrc.gov

8. Quality Assurance Program Changes (Part 50)

RIN: 3150-AG45

Abstract. The proposed rule would have amended the Commission's regulations to allow licensees to make unilateral changes to their QA programs. The NRC is terminating its plans to develop a voluntary option alternative to its regulations to allow licensees to make unilateral changes to the QA program description. This action is being taken because the petitioner, the Nuclear Energy Institute (NEI), has withdrawn the remaining issues raised in its petition for rulemaking submitted on June 8, 1995 (PRM-50-62).

Timetable: Proposed Rule Withdrawn 12/06/00 65 FR 76178

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. Undetermined

Agency Contact: Robert L. Peltis, Jr., Office of Nuclear Reactor Regulation,
(301) 415-3214, e-mail rlp4@nrc.gov

9. Reporting Requirements for Nuclear Power Reactors and Independent Spent Fuel Storage Installations at Power Reactor Sites (Parts 50 and 72)

RIN: 3150-AF98

Abstract. The final rule changes the event reporting requirements for nuclear power reactors contained in §§ 50.72 and 50.73 to better align the reporting requirements with the NRC's need for information to carry out its safety mission, reduce the reporting burden consistent with the NRC's needs, clarify the reporting requirements, and maintain consistency with NRC actions to improve integrated plant assessments.

Timetable: Final Rule Published 10/25/00 65 FR 63769
Final Rule Effective 01/23/01

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Dennis P. Allison, Office of Nuclear Reactor Regulation,
(301) 415-1178, e-mail dpa@nrc.gov

10. Domestic Licensing of Special Nuclear Material (Part 70)

RIN: 3150-AF22

Abstract. The final rule amends the Commission's regulations to provide a risk-informed performance-based regulation for certain licensees authorized to possess a critical mass of special nuclear material. Concurrent with this amendment, companion support guidance documents are being developed for issuance. This rulemaking requires affected licensees to conduct an integrated safety analysis to identify potential accidents at the facility and the items relied on for safety. This rulemaking also addresses a petition for rulemaking submitted by the Nuclear Energy Institute (PRM-70-7). This rulemaking, with the exception of §70.76, is effective October 18, 2000. Section 70.76 will become effective after the issuance of staff guidance for the implementation of that provision. Once this guidance has been developed, the NRC will publish a Federal Register notice specifying the effective date of §70.76.

Timetable: Final Rule Published 09/18/00 65 FR 56211
Final Rule Effective 10/18/00

Legal Authority: 42 USC 2201; 42 USC 2231; 42 USC 2241; 42 USC 2282

Effects on Small Business and Other Entities. Yes

Agency Contact: Andrew Persinko, Office of Nuclear Material Safety and Safeguards,
(301) 415-6522, e-mail axp1@nrc.gov

11. Clarifications and Addition of Flexibility (Part 72)

RIN: 3150-AG15

Abstract. The final rule amends the Commission's regulations to clarify the applicability of Part 72 for general and site-specific licensees and allows general licensees to clearly determine which Part 72 requirements are applicable to their activities. This rulemaking allows applicants for site-specific licenses to use cask designs previously approved under Part 72, Subpart K, without having to submit a separate safety analysis for the cask design. This rulemaking precludes the staff having to expend considerable resources in repeatedly re-examining and defending technical issues already resolved during the public rulemaking process. The rulemaking also allows the initiation of storage cask construction provided that certain conditions are met.

12. List of Approved Spent Fuel Storage Casks: Addition of the Holtec HI-STAR 100 Cask (Part 72)

RIN: 3150-AG58

Abstract. The direct final rule amends the Commission's regulations to revise the Holtec International Hi-Star 100 cask system (HI-STAR) in the List of Approved Spent Fuel Storage Casks. This amendment to the HI-STAR 100 Certificate of Compliance modifies the cask design to permit a general license to: 1) permit the storage of burnable poison rod assemblies and reactor neutron startup sources within spent fuel assemblies; 2) permit the storage of an additional type

of damaged fuel container; and 3) revise some cask design drawings to incorporate minor changes (optimizations) that were identified by the certificate holder during fabrication of the first HI-STAR 100 casks.

**13. List of Approved Spent Fuel Storage Casks: Addition of the NAC - UMS Cask
(Part 72)**

RIN: 3150-AG32

Abstract. The final rule amends the Commission's regulations to add the NAC -UMS cask system to the List of Approved Spent Fuel Storage Casks. This rulemaking allows the holders of power reactor operating licenses to store spent fuel in the NAC - UMS cask system under a general license.

Timetable: Final Rule Published 10/19/00 65 FR 62581
Final Rule Effective 11/20/00

**14. List of Approved Spent Fuel Storage Casks: TN-32 Revision*
(Part 72)**

RIN: 3150-AG66

Abstract. The direct final rule amends the Commission's regulations to revise the Transnuclear, Inc. TN-32 cask system listing in the List of Approved Spent Fuel Storage Casks to include Amendment No. 1 to the Certificate of Compliance. This amendment allows holders of power reactor operating licenses to store an additional type of spent fuel, B&W/FCF 17 x 17 Mark BW fuel assembly, in TN-32 cask under the revised conditions. This amendment also allows analysis of verification of allowable seismic loads.

Timetable: Direct Final Rule Published 12/05/00 65 FR 75853

15. List of Approved Spent Fuel Storage Casks: Revision of the NAC - UMS Cask (Part 72)

RIN: 3150-AG57

Abstract. The direct final rule amends the Commission's regulations to revise Certificate of Compliance No. 1015 for the NAC International (NAC) NAC-UMS Universal Storage System (NAC-UMS). This revision permits two changes to the NAC-UMS cask design. First, the maximum spent fuel burnup limit is increased from 45,000 to 50,000 MWD/MTU [megaWatt days per metric ton of uranium]. Second, the storage of damaged spent fuel is permitted in a damaged fuel container. This rulemaking allows the holders of power reactor operating licenses to store spent fuel in the NAC-UMS cask system under a general license.

Timetable: Direct Final Rule Published 12/07/00 65 FR 76895

16. Export and Import of Nuclear Equipment and Materials (Part 110)

RIN: 3150-AG51

Abstract. The final rule amends the Commission's regulations pertaining to the export and import of nuclear equipment and materials. Also, this rulemaking makes certain editorial revisions, and corrects typographical errors. This rulemaking is necessary to reflect the nuclear non-proliferation policies of the Executive Branch and U.S. Government obligations under nuclear agreements for cooperation, and to update the export controls of the United States in respect to the multilateral export control recommendations of the Nuclear Nonproliferation Treaty Exporters Committee (Zangger Committee) and the Nuclear Suppliers Group (NSG), of which the United States is a member.

17. Criteria for an Extraordinary Nuclear Occurrence (Part 140)

RIN: 3150-AB01

Abstract. The final rule revises the criteria for an extraordinary nuclear occurrence (ENO) to eliminate the problems that were encountered in the Three Mile Island Unit 2 ENO determination. The NRC staff has determined that this rulemaking is unnecessary, and has withdrawn this proposed rule. This notice of withdrawal also addresses a petition for rulemaking submitted by the Public Citizen Litigation Group and the Critical Mass Energy Project (PRM-140-1).

B

(B) Proposed Rules

18. Availability of Official Records (Part 2)

RIN: 3150-AC07

Abstract. The proposed amendment would conform the Commission's regulations pertaining to the availability of official records to existing case law and agency practice. The amendment would reaffirm that 10 CFR 2.790(c) provides submitters of information a qualified right to have their information returned upon request. This amendment would inform the public of three additional circumstances where information would not be returned to the applicant, i.e., information which has been made available to an advisory committee or was received at an advisory committee meeting, information discussed at an open Commission meeting under the Government in the Sunshine Act, and information that is subject to a pending Freedom of Information Act request, as well as other administrative matters. The proposed amendment would also address the NRC's procedures for handling copyrighted information, including reproduction and distribution according to normal agency practice.

19. Licensing Proceedings for the Receipt of High-Level Radioactive Waste at a Geologic Repository: Licensing Support Network, Design Standards for Participating Websites* (Part 2)

RIN: 3150-AG44

Abstract. The proposed rule would amend the Commission's Rules of Practice applicable to the use of the Licensing Support Network (LSN) for the licensing proceeding on the disposal of high-level waste at a geologic repository. The proposed amendments would establish the basic data structure and transfer standards (design standards) that LSN participant websites must use to make documentary material available. The proposed amendments would also clarify the authority of the LSN Administrator to establish guidance for LSN participants on how best to meet the design standards and to review participant designs for compliance with the standards. Finally, the proposed amendments would clarify the timing of participant compliance certifications.

20. Nondiscrimination on the Basis of Race, Color, or National Origin in Programs or Activities Receiving Federal Financial Assistance; Nondiscrimination on the Basis of Handicap in Programs or Activities Receiving Federal Financial Assistance; Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance (Part 4)

RIN: 3150-AG65

Abstract. The proposed rule would incorporate the Civil Rights Restoration Act's definitions of "program or activity" and "program" into Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1972, and the Age Discrimination Act of 1975, and would promote consistent and adequate enforcement of these statutes.

21. Fitness-for-Duty Programs (Part 26)

RIN: 3150-AF12

Abstract. The proposed rule would amend the Commission's regulations to ensure compatibility with the Department of Health and Human Services guidelines, reduce unnecessary regulatory burden in some areas, clarify the Commission's original intent of the rule, and improve overall program effectiveness and efficiency. These revised requirements would reduce the industry-wide annual cost for all licensees to comply with Part 26 by approximately \$27 million (or about \$293 million over 20 years). The rulemaking would address the Regulatory Review Group items on audit frequency and annual submittal of data. The rulemaking would also address the petition for rulemaking submitted by the Virginia Electric and Power Company (VEPCO) (PRM-26-1).

22. Medical Uses of Byproduct Material (Part 35)

RIN: 3150-AF74

Abstract. The proposed rule would amend the Commission's regulations to reflect a more risk-based approach to the regulation of the medical uses of byproduct material. Performance-oriented requirements would allow licensees the flexibility to develop procedures appropriate to their uses of byproduct material. The proposed rule would address training and experience requirements for authorized users, RSOs, authorized nuclear pharmacists and authorized medical physicists. This initiative would include development of associated guidance. The proposed rule would also address a petition for rulemaking submitted by the University of Cincinnati (PRM-20-24).

23. 120-Month ISI/IST Update Requirement (Part 50)

RIN: 3150-AG39

Abstract. The proposed rule would amend the Commission's regulations to require nuclear power plant licensees to update their inservice inspection and inservice testing programs every 120 months to comply with the version of the ASME Code incorporated by reference into the regulations and in effect 12 months preceding the start of a new 120-month interval. The Commission disapproved this proposed rulemaking in a Staff Requirements Memorandum dated April 13, 2000; therefore this rulemaking will be withdrawn during FY 2001.

24. Use of Potassium Iodide (KI) by the General Public After a Severe Accident at a Nuclear Power Plant (Part 50)

RIN: 3150-AG11

Abstract. The proposed rule would amend the Commission's regulations to require that consideration be given to include potassium iodide (KI) in conjunction with sheltering and evacuation as a protective measure for the general public. This rule also addresses two petitions for rulemaking submitted by Peter Crane (PRM-50-63/PRM-50-63A) on September 9, 1995 and November 11, 1997, respectively. This rule would require the "consideration" of using KI for the public. It would have very little impact on the nuclear industry, the public or the NRC unless a State decides to include KI for the public. This rulemaking was sent to the Commission for review and approval on February 14, 2000 (SECY-00-0040). The Commission approved the final rule change on December 22, 2000.

(301) 415-3224, e-mail mtj1@nrc.gov

25. Update Fuel Performance Considerations and Other Fuel Cycle Issues (Part 51)

RIN: 3150-AA31

Abstract. The proposed rule would amend the Commission's regulations by addressing uranium fuel cycle environmental data (Table S-3) and the environmental effects of transportation of fuel and waste data (Table S-4). In § 51.51, the environmental data would be re-estimated and reflect changes in the structure and activities of the fuel cycle and the availability of better data. Estimates of releases of Radon-222 and Technetium-99 would be added to Table S-3. The addition of a specific value for Radon-222 would address the outstanding portion of petition for rulemaking PRM-51-1, submitted by the New England Coalition on Nuclear Pollution. To provide immediate relief to the petitioners request, the Commission published a final rule on March 14, 1977 (42 FR 13803), that removed the original value for Radon-222 from Table S-3 so that it then became subject to case-specific litigation. It was anticipated that the Commission would add a specific value for Radon-222, but deferred action until a general updating of Table S-3 is undertaken. For § 51.52, the environmental impact estimates would be re-estimated to reflect the use of higher enriched fuel and discharge of higher irradiated fuels from a reactor; longer onsite storage; and changes in transportation modes, transport to retrievable storage sites and a permanent repository rather than reprocessing facilities, packaging technology, and regulatory standards. The re-estimates would incorporate current research information and computer codes.

This rulemaking would result in current and more accurate estimates of the environmental impact of licensing a new plant, and would eliminate the requirement to review the contribution to environmental impacts from Radon-222 and Technetium-99 in individual plant reviews. This rule is being reissued as a proposed rule, and would update the initial rulemaking effort to address newly emerging issues and research.

26. Use of Simulators in Operator Licensing and Conforming Changes (Part 55)

RIN: 3150-AG40

Abstract. The proposed rule would amend the Commission's regulations to promote more effective plant operating experience for initial license applicants through improved on-the-job training by allowing use of the simulation facility in lieu of the actual plant to satisfy the license eligibility requirement for performance of control manipulations that affect reactivity or power level. The rulemaking would also facilitate adaption of existing simulator support and requalification training programs to the 1998 revision of the national standard (ANSI/ANS-3.5) to eliminate recurring outdated, duplicate, and inefficient simulator performance testing and reporting requirements. This rulemaking would bring the NRC's current regulations up-to-date with evolutionary changes in simulation technology, training, and examination programs. This rulemaking would directly reduce unnecessary regulatory burden by eliminating the current requirement for submittal of certification and performance test reports on a quadrennial basis.

27. Disposal of High-Level Radioactive Waste in a Proposed Geologic Repository at Yucca Mountain, Nevada (Part 63)

RIN: 3150-AG04

Abstract. The proposed rule would establish regulations as directed by statute (Energy Policy Act of 1992) for the disposal of high-level waste at Yucca Mountain. The proposed rule would provide specific criteria applicable to Yucca Mountain and would state that the more generic

requirements in the existing Part 60 do not apply and cannot be the subject of litigation in any NRC licensing proceeding for Yucca Mountain. The proposed rule would also address a petition for rulemaking submitted by the States of Nevada and Minnesota (PRM-60-2/2A).

28. Storage of Greater Than Class C Waste (Part 72)

RIN: 3150-AG33

Abstract. The proposed rule would amend the Commission's regulations to include storage of Greater than Class C (GTCC) waste, i.e., waste that exceeds the concentration limits of radionuclides established for Class C waste in 10 CFR 61.55(a)(2)(iv). It is anticipated that the decommissioning activities at nuclear power plants will generate relatively small volumes of GTCC waste. However, because there are currently no disposal options for GTCC waste, utilities must store these wastes under their Part 50 licenses pending development of a disposal facility. The Department of Energy has the responsibility for developing a national strategy for disposal of GTCC waste. Based on current plans, this disposal capability will not likely be available for many years. This rule would allow independent spent fuel storage installations to store GTCC waste similar to storage of spent fuel and facilitate the likely eventual transfer to a permanent geologic repository. This proposed rule would also respond to a petition for rulemaking submitted by the Portland General Electric Company (PRM-72-2).

29. List of Approved Spent Fuel Storage Casks: Addition of the Fuel Solutions Cask (Part 72)**RIN:** 3150-AG54

Abstract. The proposed rule would amend the Commission's regulations to add the Fuel Solutions cask system to the List of Approved Spent Fuel Storage Casks so that holders of operating power reactor licenses can use this cask under a general license. Otherwise, holders of power reactor operating licenses would have to obtain a specific license to use these casks.

C

(C) Advance Notices of Proposed Rulemaking

30. Disposal by Release into Sanitary Sewerage (Part 20)

RIN: 3150-AE90

Abstract. The advance notice of proposed rulemaking (ANPRM) was published to request public comment, information, and recommendations on contemplated amendments to the Commission's regulations governing the release of radionuclides from licensed nuclear facilities into sanitary sewer systems. The Commission believes that by incorporating current sewer treatment technologies, the contemplated rulemaking would improve the control of radioactive materials released to sanitary sewer systems by licensed nuclear facilities. The NRC and the Environmental Protection Agency are conducting a joint survey of sewage treatment plants to evaluate the extent of contamination due to release of radioactive material into sewerage systems. The need for and the extent of a rulemaking will be evaluated pending on the result of the survey and the associated dose assessment. This rulemaking would also address a petition for rulemaking submitted by the Northeast Ohio Sewer District (PRM-20-22).

(301) 415-6319, e-mail lwc1@nrc.gov**31. Risk-Informing Special Treatment Requirements (Parts 21, 50, 54, and 100)**

RIN: 3150-AG42

Abstract. The advance notice of proposed rulemaking (ANPRM) invited comments, advice, and recommendations from interested parties on the contemplated rulemaking that would provide an alternative, risk-informed approach for special treatment requirements in the current regulations. Special treatment requirements are requirements imposed on structures, systems, and components (SSCs) that provide additional confidence so that these SSCs are capable of meeting design basis functional requirements. The contemplated risk-informed approach would categorize SSCs and vary the associated regulatory treatment based on the SSCs safety significance. This action is a result of the Commission's continuing efforts to risk-inform its regulations. The schedule for this rulemaking has been delayed primarily due to delays associated with the review of a South Texas exemption request from special treatment requirements (proof-of-concept submittal).

32. Advance Notification to Native American Tribes of Transportation of Certain Types of Nuclear Waste (Parts 71 and 73)

RIN: 3150-AG41

Abstract. The advance notice of proposed rulemaking (ANPRM) invited early input from affected parties and the public on the issues associated with the advance notification of Indian Tribes of spent fuel shipments. The Department of Energy (DOE) has indicated that it intends to comply with NRC's physical protection requirements for shipments under the Nuclear Waste Policy Act, however, its current practices conflict with NRC regulations. For example, DOE already has asked for and will continue to ask for exemptions from the shipment itinerary information requirements of foreign research reactor fuel. DOE, as a courtesy, provides Indian Tribes with notification of spent fuel shipments. NRC's current regulations do not address notification of Indian Tribes. Further, DOE has developed a satellite tracking system to monitor the status of spent fuel shipments at all times. Distribution of this status information to parties other than Governors' designees is also not compatible with NRC regulations. NRC staff will analyze the comments received to determine if a rulemaking is needed. A notice reopening the public comment period was published in the Federal Register on April 6, 2000 (65 FR 18010). The comment period closed on July 5, 2000.

(D) Unpublished Rules

D

33. Changes to Adjudicatory Process (Part 2)

RIN: 3150-AG49

Abstract. The proposed rule would amend the Commission's regulations concerning its rules of practice to make the agency's hearing process more efficient and effective. The proposed amendments would fashion hearing procedures that are tailored to the different types of licensing and regulatory activities the NRC conducts and would better focus and use the limited resources available to involved parties.

Timetable: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Geary Mizuno, Office of the General Counsel,
(301) 415-1639, e-mail gsm@nrc.gov

34. Submission of Documents Electronically; Minor Corrections (Parts 2, 4, 9, 15, 19 - 21, 25, 26, 30 - 32, 34, 40, 50, 51, 55, 60 - 62, 70 - 76, 81, 95, 110, 140, and 150)

RIN: 3150-AF61

Abstract. The direct final rule will amend the Commission's regulations to permit voluntary electronic submission of documents and provide procedures for submitting documents electronically. Amending the regulations to permit electronic submission would facilitate the electronic capture of externally generated documents into NRC's Agencywide Documents Access and Management System (ADAMS). The rulemaking will address and improve the document control and records management issues which are of concern to the NRC, its applicants, licensees, and members of the public, by improving the process of communication, dissemination, and storage of records. The rule will incorporate minor corrections to the current regulations regarding the submission of documents to the NRC, e.g., organizational, name, and phone number changes. This rulemaking is consistent with existing legislative and regulatory initiatives, such as the Paperwork Reduction Act of 1995, Office of Management and Budget, Circular A-130 (Revised February 8, 1996), and the Government Paperwork Elimination Act of 1998, to reduce the information collection burden on the public and to make information more readily accessible to the public.

35. Release of Part of a Reactor Facility or Site for Unrestricted Use Before Receiving Approval of the License Termination Plan (Parts 2 , 20, and 50)

RIN: 3150-AG56

Abstract. The proposed rule would amend the Commission's regulations by adding a new section that would identify the criteria and regulatory framework that a licensee would use to request NRC approval for a partial site release. The rulemaking would provide additional assurance that residual radioactivity would meet the radiological criteria for license termination, even if parts of the site were released before a licensee submits its license termination plans. The rulemaking would clarify that the radiological criteria for unrestricted use apply to a partial site release. The rulemaking would not provide for a partial site release under restricted conditions. Also, the rulemaking would provide for a Subpart 2 hearing if a license amendment involving a partial site release is challenged.

The rulemaking would fill a gap identified during the NRC's consideration of a technical specification amendment request for the Oyster Creek Nuclear Generating Station to remove a restriction on the sale or lease of property within the exclusion area. During the Oyster Creek review, the NRC staff concluded that it is possible for a reactor licensee to sell land that would reduce the size of its site before the license termination criteria would specifically apply to the release of the property. If the sale does not involve the transfer of licensed material, it would not require NRC approval under current regulations. Currently, the NRC must consider changes to the site boundary of a reactor site on a case-by-case basis to ensure adequate protection of the public and the environment. Because several reactor licensees have expressed interest in selling parts of the sites before they receive approval of their license termination plans, the NRC staff believes the issues should be resolved generically by rulemaking.

36. Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance (Part 5)

RIN: 3150-AG68

Abstract. The proposed rule would amend the Commission's regulations to include a list of the types of Federal financial assistance activities administered by the NRC under Title IX of the Education Amendments of 1972, as amended (Title IX). Title IX prohibits recipients of Federal financial assistance from discriminating on the basis of sex in education programs or activities. Subpart F of the Title IX common rule (August 30, 2000; 65 FR 52858) requires each Federal agency that awards Federal financial assistance to publish in the Federal Register a list of Federal financial assistance administered by that Agency.

Effects on Small Business and Other Entities. None

Agency Contact: Marva C. Gary, Office of Small Business and Civil Rights,
(301) 415-7382, e-mail mcg@nrc.gov

37. Protection Against Discrete Radioactive Particles (DRPs) - A Unified Skin Dose Limit (Part 20)

RIN: 3150-AG25

Abstract. The proposed rule would amend the Commission's regulations to establish a unified skin dose limit that would apply to all skin dose situations including "hot particle" exposures. Based on discussions with industry and technical experts who have served on the NCRP/DRP committee, the NRC staff is recommending an approach to establishing a dose limit for dose to the skin from DRPs that would result in creating a unified skin dose limit. This limit would be applicable to all skin dose geometries and any source. This approach would require an advisory from the National Council on Radiation Protection and Measurements (NCRP) that would permit the NRC staff to use the NCRP recommended limit of "50 rem averaged over the highest exposed 10 square centimeters" for all exposures to the skin.

38. Reduction in the Scope of Random Fitness-for-Duty Testing Requirements for Nuclear Power Reactor Licensees (Part 26)

RIN: 3150-AG62

Abstract. The proposed rule would amend the Commission's regulations to require random drug and alcohol testing of only those persons with unescorted access to vital areas, and eliminate random testing of employees who must physically report to the Technical Support Center or Emergency Operations Facility during an emergency. However, personnel with unescorted access to the protected area would continue to be covered by 10 CFR 26.24(a)(1) for pre-access fitness-for-duty testing and by 10 CFR 26.24(a)(3) for "for-cause" fitness-for-duty testing. The proposed amendment is expected to decrease burden by reducing the total numbers of tests conducted and the number of files maintained.

39. Transfers of Source Material from Licensees to Exempt Persons* (Part 40)

RIN: 3150-AG64

Abstract. The proposed rule would amend the Commission's regulations to require NRC approval for transfers from licensees of unimportant quantities of source material (less than 0.05 percent by weight) to persons exempt from licensing requirements. The objective of this proposed action is to ensure that the regulations regarding transfers of materials containing low concentrations of source material are adequate to protect public health and safety.

40. Codes and Standards (Part 50)

RIN: 3150-AG61

Abstract. The proposed rule would amend the Commission's regulations to incorporate by reference the following: (1) The 1997 Addenda, 1998 Edition, 1999 Addenda, and 2000 Addenda of Division 1 rules of Section III, "Rules for Construction of Nuclear Power Plant Components," of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME B&PV Code); (2) the 1997 Addenda, 1998 Edition, 1999 Addenda, and 2000 Addenda of Division 1 rules of Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," of the ASME B&PV Code; and (3) the 1997 Addenda, 1998 Edition, 1999 Addenda, and 2000 Addenda of the ASME Code for Operation and Maintenance of Nuclear Power Plants.

Timetable:	Proposed Rule Published	09/00/01

41. Integrated Rulemaking for Decommissioning Nuclear Power Reactors (Part 50)

RIN: 3150-AG47

Abstract. An SRM dated June 23, 1999, directed the NRC staff to consider an integrated, risk-informed decommissioning rule rather than individual rulemakings to address emergency preparedness, insurance, safeguards, operator staffing, and backfit for nuclear power plants that are being decommissioned. SECY-99-168 dated June 30, 1999, recommended that the integrated approach be approved and outlined staff plans for pursuing such a rulemaking. Accordingly, the staff has subsumed previous rulemaking activities in the areas of emergency planning, insurance, safeguards, operator staffing, and backfit into one integrated rulemaking effort. This rulemaking would apply to licensees who certified, pursuant to 10 CFR 50.82(a), that

they have permanently ceased facility operation(s) and have permanently removed fuel from the reactor vessel. The Commission approved this approach in an SRM dated December 21, 1999. This rulemaking would also address a petition for rulemaking submitted by the North Carolina Public Utility Commission (PRM-50-57).

In SECY-00-0145 dated June 28, 2000, the NRC staff recommended a decommissioning rulemaking plan in the areas of emergency planning, insurance, safeguards, operator staffing and backfit (the integrated decommissioning rulemaking plan). The rulemaking plan relied on a decommissioning risk study as a basis for its recommendations. The Commission returned the rulemaking plan to the staff for rework in September 2000. Because the staff is assessing the impact of the risk study on the integrated rulemaking plan, a new schedule for issuance of the integrated rulemaking plan has not yet been established.

Timetable: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: William Huffman, Office of Nuclear Reactor Regulation,
(301) 415-1141, e-mail wch@nrc.gov

42. Performance-Based, Risk-Informed Fire Protection (Part 50)

RIN: 3150-AG48

Abstract. The proposed rule would address the Commission's direction provided in the staff requirements memorandum dated April 1, 1999, to develop a performance-based, risk-informed alternative to the NRC's existing reactor fire protection requirements through the adoption of an industry consensus standard; NFPA 805, "Performance-Based Standard for Fire Protection for Light-Water Reactor Electric Generating Plants."

Timetable: Proposed Rule Published 11/00/01

Final Rule Published 11/00/02

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Edward A. Connell, Office Nuclear Rector Regulation,
(301) 415-2838, e-mail eac@nrc.gov

43. Decommissioning Trust Provisions (Part 50)

RIN: 3150-AG52

Abstract. The proposed rule would amend the Commission's regulations to ensure that decommissioning trust agreements are in a form acceptable to the NRC to increase assurance that decommissioning funds will be available for their intended purpose, especially in light of economic deregulation and restructuring of the electric utility industry. Based on past experience with the NRC approval of the transfers of the operating licenses of the Three Mile Island Unit 1 and Pilgrim Nuclear Power Stations, the staff believes that this rulemaking would expedite similar transfers in the future. The staff also intends to develop guidance, by revising Regulatory Guide 1.159, "Assuring the Availability of Funds for Decommissioning Nuclear Reactors," that will specify more fully the provisions of the decommissioning trust agreements.

Timetable: Proposed Rule Published 05/00/01

Final Rule Published 05/00/02

Legal Authority: 42 USC 2201; 42 USC 5841

Effects on Small Business and Other Entities. None

Agency Contact: Brian J. Richter, Office of Nuclear Reactor Regulation,
(301) 415-1978, e-mail bjr@nrc.gov

44. Material Control and Accounting* (Parts 51, 61, 70, 72, 73, 74, 75, 76, and 150)

RIN: 3150-AG69

Abstract. The proposed rule would amend the reporting requirements for submitting material balance reports and inventory composition reports to provide more flexibility and to reduce the reporting frequency for most licensees. The proposed amendments would also revise the categorical exclusion for approving safeguards plans, relocate the remaining material control and accounting requirements in Parts 70 through 74, make the material control and accounting requirements for Category II facilities more risk-informed, and make other miscellaneous changes.

Timetable: Proposed Rule Published 07/00/01

Effects on Small Business and Other Entities. None

Agency Contact: Merri Horn, Office of Nuclear Material Safety and Safeguards,
(301) 415-8126, e-mail mlh1@nrc.gov.

45. Lessons Learned from Design Certification (Part 52)

RIN: 3150-AG24

Abstract. The proposed rule would amend the Commission's regulations by revising the regulatory infrastructure to prepare for future applications. The proposed rule would involve changes to licensing procedures and would require combined license applicants and holders to create, maintain, update, and use a PRA for the life of the facility. The proposed rule would subsume the rulemaking, "Standardized Plant Designs, Early Review of Sites Suitability issues; Clarifying Amendments" (RIN 3150-AE25), that would remove redundant Appendices M, N, O, and Q from Part 50. These appendices are being removed because they became obsolete when Part 52 was created. The Part 52 rulemaking plan (SECY-98-282) was approved by the Commission on January 14, 1999.

Timetable:	Proposed Rule Published	07/00/01

46. Compatibility with IAEA Transportation Safety Standards* (Part 71)

RIN: 3150-AG71

Abstract. The proposed rule would amend the Commission's regulations on packaging and transporting radioactive material to make them compatible with the International Atomic Energy Agency (IAEA) standards and to codify other applicable requirements. These changes would be compatible with ST-1, the latest revision of the IAEA transportation standards. This rulemaking would also address the unintended economic impact of NRC's emergency final rule entitled, "Fissile Material Shipments and Exemptions" (February 10, 1997; 62 FR 5907), and a petition for rulemaking submitted by International Energy Consultants, Inc. (PRM-71-12) (February 19, 1998; 63 FR 8362).

**47. Geological and Seismological Characteristics of Spent Fuel Storage Systems
(Part 72)**

RIN: 3150-AG16

Abstract. The proposed rule would amend the Commission's regulations concerning geological and seismological criteria to require the use of a risk-informed, performance-based regulatory approach. This revision would use a methodology that is consistent with the approach taken in Part 50 and the recent revision to Part 100. The proposed rule would also clarify the need for a general licensee to design cask storage pads and areas to adequately support both static and dynamic loads of the stored casks.

Timetable: Proposed Rule Published Undetermined

Legal Authority: 42 USC 2201; 42 USC 5841

**49. List of Approved Spent Fuel Storage Casks: FuelSolutions Revision *
(Part 72)**

RIN: 3150-AG72

Abstract. The direct final rule will amend the Commission's regulations to revise the Certificate of Compliance No. 1026 for the FuelSolutions cask system. This change, Amendment No. 1, will modify the present cask system design to allow the Big Rock Point nuclear reactor facility to store mixed-oxide fuel assemblies, partial fuel assemblies, and damaged fuel assemblies (in a can) under a general license.

Timetable: Direct Final Rule Published 02/00/01

**50. List of Approved Spent Fuel Storage Casks: HI-STAR 100 Cask System,
Amendment 2* (Part 72)**

RIN: 3150-AG67

Abstract. The direct final rule will amend the Commission's regulations to revise the Certificate of Compliance No. 1008 for the HI-STAR 100 cask system. This change will modify the specifications for the cask pad and foundation. The changes will give individual cask users more flexibility in designing the site-specific cask pads.

51. Re-evaluation of Power Reactor Physical Protection Regulations and Position on a Definition of Radiological Sabotage (Part 73)

RIN: 3150-AG63

Abstract. The proposed rule would amend the Commission's regulations to require power reactor licensees to conduct drills and exercises to evaluate their protective strategy against a simulated design basis threat (DBT) of radiological sabotage. The proposed rulemaking would include risk insights, supporting guidance documents, and be more performance based.

Timetable:	Proposed Rule Published	11/00/01

52. Termination of Section 274i Agreement Between the State of Louisiana and the NRC (Part 150)

RIN: 3150-AG60

Abstract. The final rule will amend the Commission's regulations by removing the specific reference to the inspection agreement, referred to as the 274i Agreement, with the State of Louisiana. The 274i Agreement allowed the State of Louisiana to perform inspections or other functions in offshore waters adjacent to Louisiana on behalf of the NRC. This action is necessary due to a letter from the Governor of Louisiana requesting termination of the Agreement. In it, he noted difficulties arranging transportation and lack of both financial and personnel resources that made it burdensome to conduct offshore activities for the NRC. The State of Louisiana and the NRC have concluded that the 274i Agreement is no longer needed and should be terminated.

53. Revision of Fee Schedules; Fee Recovery, FY 2001* (Parts 170 and 171)

RIN: 3150-AG73

Abstract. The proposed rule would amend the licensing, inspection, and annual fees charged to NRC licensees and applicants for an NRC license. The rulemaking is necessary to recover the NRC's total budget authority for Fiscal Year (FY) 2001, less the amount appropriate for the Nuclear Waste Fund and the General Fund. The Omnibus Budget Reconciliation Act (OBRA) of 1990, as amended, requires that the NRC accomplish 100 percent recovery through the assessment of fees. However, in order to address fairness and equity concerns related to charging NRC licensees for agency expenses that do not provide a benefit to the licensee, the FY 2001 Energy and Water Development Appropriations Act requires that only 98 percent of the NRC's new budget authority (i.e., NRC's total budget authority, less the amount appropriated for the Nuclear Waste Fund and the General Fund) be collected from fees in FY 2001 -- decreasing by 2 percent per year to 90 percent by FY 2005. The dollar amount to be recovered for FY 2001 is approximately \$453.3 million. OBRA requires that the fees for FY 2001 must be collected by September 30, 2001.

Timetable:	Proposed Rule Published	03/00/01
	Final Rule Published	08/00/01

or Petitions Denied**

**II
PETITIONS**

A

1. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-50-62)**Federal Register Citation:** September 4, 1995 (60 FR 47716)**Subject:** Quality assurance program changes**Summary:** The petitioner requested that the Commission amend its regulations to allow nuclear power plant licensees to make a broader range of changes to quality assurance programs without prior NRC approval.**Timetable:** This petition was partially granted through a direct final rule "Quality Assurance Programs" (RIN AG20)(February 23, 1999; 64 FR 9030). The petitioner has withdrawn the remaining issues raised in its petition because industry implementation of the direct final rule appears adequate to address the needs of the petition. A notice withdrawing this petition was published in the Federal Register on December 6, 2000 (65 FR 7178).**Agency Contact:** Robert L. Pettis, Jr., Office of Nuclear Reactor Regulation,
(301) 415-3214, e-mail rlp4@nrc.gov

2. Petitioner/Petition Docket Number: Atlantic City Electric Company, Austin Energy, Central Maine Power Company, Delmarva Power & Light Company, South Mississippi Electric Power Association, and Washington Electric Cooperative, Inc. (PRM-50-64)**Federal Register Citation:** January 5, 1999 (64 FR 432)**Subject:** Potential liability of non-operating co-owners of nuclear power plants**Summary:** The petitioners requested that the Commission amend its regulations to clarify NRC policy regarding the potential liability of joint owners, if other joint owners become financially incapable of bearing their share of the burden for safe operation or decommissioning of a nuclear power plant.**Timetable:** A notice of denial of this petition was published in the Federal Register on July 31, 2000 (65 FR 46661).**Agency Contact:** Brian J. Richter, Office of Nuclear Reactor Regulation,
(301) 415-1978, e-mail bjr@nrc.gov

3. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-70-7)

Federal Register Citation: November 26, 1996 (61 FR 60057)

Subject: Use of an integrated safety assessment, or an acceptable alternative, to confirm that adequate controls are in place to protect public health and safety

Summary: The petitioner requested that the Commission amend its regulations to require uranium processing, uranium enrichment, and fuel fabrication licensees to use an integrated safety assessment, or an acceptable alternative, to confirm that adequate controls are in place to protect public health and safety. The petitioner also requested that a backfitting provision be established to ensure regulatory stability for these types of licensees.

Timetable: A final rule (Domestic Licensing of Special Nuclear Material (RIN AF22)), addressing this petition was published in the Federal Register on September 18, 2000 (65 FR 56211).

Agency Contact: Theodore Sherr, Office of Nuclear Material Safety and Safeguards,
(301) 415-7218, e-mail tss@nrc.gov

4. Petitioner/Petition Docket Number: Public Citizen Litigation Group and Critical Mass Energy Project (PRM-140-1)

Federal Register Citation: August 28, 1979 (44 FR 50419)

Subject: Extraordinary nuclear occurrence (ENO)

Summary: The petitioner requested that the Commission find that the nuclear accident commencing on March 28, 1979, at Three Mile Island Unit 2 constitutes an ENO. The petitioner also requested that the Commission amend the criteria used by the Commission to determine whether an ENO has occurred.

Timetable: This petition was originally addressed in a proposed rule, "Criteria for an Extraordinary Nuclear Occurrence" published on April 9, 1985 (50 FR 13978). The April 9, 1985 proposed rule was withdrawn and the petition for rulemaking was denied in a Federal Register notice published on October 17, 2000 (65 FR 61283).

5. **Petitioner/Petition Docket Number:** Northeast Ohio Regional Sewer District (PRM-20-22)

Federal Register Citation: October 20, 1993 (58 FR 54071)

Subject: Release of radioactive material to the sanitary sewer system

Summary: The petitioner requested that the Commission amend its regulations to require that licensees provide at least 24 hours advance notice to the appropriate sewage treatment plant before releasing radioactive material to the sanitary sewer system. The petitioner also requested that the NRC exempt materials that enter the sanitary waste stream from the requirements regarding Commission approval for incineration under the NRC's current regulations.

Timetable: A notice of receipt for this petition was published in the Federal Register on October 20, 1993 (58 FR 54071). The public comment period closed on January 3, 1994. The petition is scheduled to be addressed by rulemaking, "Disposal by Release Into Sanitary Sewerage" (RIN AE90). The advance notice of proposed rulemaking was published in the Federal Register on February 25, 1994 (59 FR 9146). Publication of the proposed rule is undetermined.

Agency Contact: Lydia Chang, Office of Nuclear Material Safety and Safeguards,
(301) 415-6319, e-mail lwc1@nrc.gov

6. **Petitioner/Petition Docket Number:** University of Cincinnati (PRM-20-24)

Federal Register Citation: June 21, 1996 (61 FR 31874)

Subject: Visitors of radiation patients, as members of the public, to receive up to 500 mrem per year

Summary: The petitioner requested that the Commission amend its regulations to authorize specified visitors of radiation patients, as members of the public, to receive up to 500 mrem per year. The petitioner believes that the proposed amendment would permit a small population of the general public to be infrequently exposed to an annual exposure limit of 500 mrem total effective dose equivalent.

Timetable: A notice of receipt for this petition was published in the Federal Register on June 21, 1996 (61 FR 31874). The public comment period closed on September 4, 1996. This petition is being addressed by a proposed rule "Medical Uses of Byproduct Material" (RIN AF74). The proposed rule was published in the Federal Register on August 13, 1998 (63 FR 43516). The final rule is scheduled to be published in March 2001.

Agency Contact: Cathy Haney, Office of Nuclear Material Safety and Safeguards,
(301) 415-6825, e-mail cxh@nrc.gov

7. Petitioner/Petition Docket Number: Virginia Electric and Power Company (PRM-26-1)

Federal Register Citation: N/A

Subject: Fitness-for-Duty Programs

Summary: The petitioner requested that the Commission amend its regulations to change the frequency that licensees are required to audit their fitness-for-duty programs from annually to biennially.

Timetable: A notice of receipt was not published for this petition. This petition qualified for special fast-track handling, as specified in 10 CFR 2.802(e); publication of the docketing of PRM-26-1 was not required. This petition was addressed in a proposed rulemaking, "Fitness-for-Duty Program" (RIN AF12). The proposed rule was published in the Federal Register on May 9, 1996 (61 FR 21105). The final rule is scheduled to be published in April 2001.

Agency Contact: Garmon West, Jr., Office of Nuclear Reactor Regulation,
(301) 415-1044, e-mail ffd@nrc.gov
Richard P. Rosano, Office of Nuclear Reactor Regulation,
(301) 415-3282, e-mail rpr@nrc.gov

8. Petitioner/Petition Docket Number: Peter G. Crane (PRM-50-63 and PRM-50-63A)

Federal Register Citation: November 27, 1995 (60 FR 58256)
December 17, 1997 (62 FR 66038)

Subject: Emergency Planning

Summary: The petitioner requested that the Commission amend its regulations concerning emergency planning to include a requirement that emergency planning protective actions include the prophylactic use of potassium iodide, which may prevent thyroid cancer after nuclear accidents. The petitioner's suggested amendment would specifically require the prophylactic use of potassium iodide. In the amendment to the petition (PRM-50-63A), the petitioner requested that the regulations be amended to recommend that the prophylactic use of potassium iodide be considered in developing a range of protective actions for emergency workers and the public.

Timetable: A notice of receipt for this petition was published in the Federal Register on November 27, 1995 (60 FR 58256). The public comment period closed on February 12, 1996. The amendment to the petition was published in the Federal Register on December 17, 1997 (62 FR 66038). The public comment period closed on January 16, 1998. This petition is being

addressed in a proposed rulemaking "Use of Potassium Iodide (KI) by the General Public After a Severe Accident at a Nuclear Power Plant" (RIN AG11). The proposed rule was published in the Federal Register on June 14, 1999 (64 FR 31737). The final rule was published on January 19, 2001.

Agency Contact: Michael Jamgochian, Office of Nuclear Reactor Regulation,
(301) 415-6534, e-mail mtj1@nrc.gov

9. Petitioner/Petition Docket Number: States of Nevada and Minnesota (PRM-60-2/2A)

Federal Register Citation: April 30, 1985 (50 FR 18267)

Subject: Implementation of environmental standards proposed by the Environmental Protection Agency (EPA)

Summary: The petitioner requested that the Commission amend its regulations to (1) adopt a regulation governing the implementation of certain environmental standards that have been proposed by the EPA; and (2) amend its repository licensing regulations to incorporate the equivalent substance of the assurance requirements as issued in the final EPA standards.

Timetable: A notice of receipt for this petition was published in the Federal Register on April 30, 1985 (50 FR 18267). The public comment period closed on July 30, 1985. Portions of the petition have been denied and were addressed in the final rule, "NEPA Review Procedures for Geologic Repositories for High-Level Waste," published on July 3, 1989 (54 FR 27864). The remaining portions of the petition will be addressed through a separate rulemaking "Disposal of High-Level Wastes in a proposed Geologic Repository at Yucca Mountain, Nevada" (RIN AG04). The proposed rule was published on February 22, 1999 (64 FR 8640). The final rule is scheduled to be published in June 2001.

10. Petitioner/Petition Docket Number: Portland General Electric Company (PRM-72-2)

Federal Register Citation: February 1, 1996 (61 FR 3619)

Subject: Disposal of radioactive waste (greater than class C)

Summary: The petitioner requested that the Commission amend its regulations which govern independent storage of spent nuclear fuel and high-level radioactive waste to specifically include greater than class C radioactive waste produced from reactor operations pending its transfer to a permanent disposal facility.

Timetable: A notice of receipt for this petition was published in the Federal Register on February 1, 1996 (61 FR 3619). The public comment period closed on April 16, 1996. The petition will be addressed by rulemaking, "Storage for Greater Than Class C Waste" (RIN AG33). The proposed rule was published on June 16, 2000 (65 FR 37712). The final rule is scheduled to be published in September 2001.

Agency Contact: Mark Haisfield, Office of Nuclear Material Safety and Safeguards,

(C) Petitions Incorporated into Unpublished Rules

11. Petitioner/Petition Docket Number: Amersham Corporation (PRM-34-5)**Federal Register Citation:** June 18, 1996 (61 FR 30837)**Subject:** Radiographic equipment regulations

Summary: The petitioner requested that the Commission amend its regulations by removing the reference to "associated equipment" from the radiography equipment regulations. The petitioner believes that this amendment would clarify the licensing reviews of sealed sources and radiographic exposure devices to meet the applicable requirements.

Timetable: A notice of receipt for this petition was published in the Federal Register on June 18, 1996 (61 FR 30837). The comment period closed on September 3, 1996. This petition is scheduled to be addressed by rulemaking. The completion of the rulemaking plan is undetermined.

Agency Contact: Thomas Young, Office of Nuclear Material Safety and Safeguards,
(301) 415-5795, e-mail tfy@nrc.gov

12. Petitioner/Petition Docket Number: State of Colorado and Organization of Agreement States (PRM-40-27)**Federal Register Citation:** July 7, 1999 (64 FR 36615)**Subject:** Exemption for source material general licensees

Summary: The petitioner requested that the Commission amend its regulations to restrict the exemption in § 40.22(b) for source material general licensees from the radiation protection and worker notification requirements in 10 CFR Parts 19 and 20. Current NRC regulations exempt source material general licensees from the requirements that specify standards of protection against radiation and notification of individuals who participate in licensed activities. The petitioner believes that no basis exists for exempting these licensees from compliance with radiation safety standards if a licensee can exceed currently specified dose limits, create areas where individuals may be exposed to radiation, or dispose of radioactive waste in a manner that is not permitted for other licensees.

Timetable: A notice of receipt for this petition was published in the Federal Register on July 7, 1999 (64 FR 36615). The public comment period closed on September 20, 1999. The petition is scheduled to be addressed by rulemaking. The rulemaking plan is scheduled for completion in March 2001.

Agency Contact: Gary Comfort, Office of Nuclear Material Safety and Safeguards,
(301) 415-8106, e-mail gcc1@nrc.gov

13. Petitioner/Petition Docket Number: Donald A. Barbour, Philotechnics (PRM-40-28)

Federal Register Citation: January 21, 2000 (65 FR 3394)

Subject: Effective control of depleted uranium aircraft counterweights

Summary: The petitioner requested that the Commission amend its regulations governing the domestic licensing of source material to provide additional rules for the effective control of depleted uranium aircraft counterweights. The petitioner believes that this regulatory clarification should address a number of issues concerning the exemption, storage, and disposal of these devices.

Timetable: A notice of receipt for this petition was published in the Federal Register on January 21, 2000 (65 FR 3394). The comment period closed on April 5, 2000. This petition is scheduled to be addressed by rulemaking. The rulemaking plan is scheduled for completion in March 2001.

(301) 415-6264, e-mail cmm@nrc.gov

14. Petitioner/Petition Docket Number: North Carolina Public Staff Utility Commission
(PRM-50-57)

Federal Register Citation: January 17, 1992 (57 FR 2059)

Subject: Reducing or eliminating insurance requirements at decommissioned nuclear power plants

Summary: The petitioner requested that the Commission amend its regulations to substantially reduce or eliminate insurance requirements for nuclear power reactors when all the nuclear reactors on a reactor station site have been shutdown and are awaiting decommissioning and all the nuclear fuel has been removed from the reactor site.

Timetable: A notice of receipt for this petition was published in the Federal Register on January 17, 1992 (57 FR 2059). The public comment period closed on March 17, 1992. The petition is scheduled to be addressed by rulemaking. Completion of the rulemaking plan is undetermined.

Agency Contact: William Huffman, Office of Nuclear Reactor Regulation,
(301) 415-1141, e-mail wch@nrc.gov

15. Petitioner/Petition Docket Number: New England Coalition on Nuclear Pollution
(PRM-51-1)

Federal Register Citation: January 16, 1976 (41 FR 2448)

Subject: Amendments to Table S-3 in 10 CFR Part 51

Summary: The petitioner requested that the Commission amend its regulations to "Table S-3 - Summary of Environmental Considerations for Uranium Fuel Cycle" [Uranium Fuel Cycle Environmental Data -Table S-3].

Timetable: A notice of receipt for this petition was published in the Federal Register on January 16, 1976 (41 FR 2448). The public comment period closed on March 16, 1976. The Commission closed three issues by denial in a Federal Register notice published on April 14, 1978 (43 FR 15613). Action on the remaining issue will be addressed by rulemaking, "Addition of Radon-222 and Technetium-99 Values to Table S-3 and Revisions Resulting from Consideration of Higher-Burnup Fuel" (RIN AA31). Publication of the proposed rule is undetermined.

Agency Contact: Donald Cleary, Office of Nuclear Reactor Regulation,
(301) 415-3903, e-mail dpc@nrc.gov

16. Petitioner/Petition Docket Number: International Energy Consultants (PRM-71-12)

Federal Register Citation: February 19, 1998 (63 FR 8362)

Subject: Packaging and transportation of radioactive material

Summary: The petitioner requested that the Commission amend its regulations governing special requirements for the transportation of plutonium under Part 71. The petitioner requested that § 71.63 be removed.

Timetable: A notice of receipt for this petition was published in the Federal Register on February 19, 1998 (63 FR 8362). The public comment period closed on July 31, 1998 (63 FR 34335). The petition is scheduled to be addressed by a rulemaking that would revise Part 71 for compatibility with the International Atomic Energy Agency standards, as well as making other changes. Publication of the proposed rule is scheduled for June 2001.

Agency Contact: Naiem Tanious, Office of Nuclear Material Safety and Safeguards,
(301) 415-6103, e-mail nst@nrc.gov

(D) Petitions Pending Staff Review

D

17. Petitioner/Petition Docket Number: Michael Stein (PRM-2-12)**Federal Register Citation:** November 3, 1999; 64 FR 59669**Subject:** Deliberate misconduct and employee protection

Summary: The petitioner requested that the Commission amend its regulations pertaining to deliberate misconduct and employee protection to ensure that all individuals are afforded the right to respond to an NRC determination that the individual has violated NRC regulations. The petitioner believes that the NRC regulations pertaining to deliberate misconduct and employee protection are missing certain needed safeguards.

Timetable: A notice of receipt for this petition was published in the Federal Register on November 3, 1999 (64 FR 59669). The comment period closed on January 18, 2000. Resolution of the petition is undetermined.

Agency Contact: Barry Westreich, Office of Enforcement
(301) 415-3456, e-mail bcw@nrc.gov

18. Petitioner/Petition Docket Number: Ohio Citizens for Responsible Energy, Inc. (PRM-9-2)**Federal Register Citation:** June 13, 1994 (59 FR 30308)**Subject:** Public access to licensee-held information

Summary: The petitioner requested that the Commission amend its regulations to establish public right-to-know provisions that would ensure public access to licensee-held information.

Timetable: A notice of receipt for this petition was published in the Federal Register on June 13, 1994 (59 FR 30308). The comment period closed on August 29, 1994. Resolution of the petition is scheduled for February 2001.

Agency Contact: Maria Schwartz, Office of the General Counsel,
(301) 415-1888, e-mail mes@nrc.gov

19. Petitioner/Petition Docket Number: Barry Quigley (PRM-26-2)**Federal Register Citation:** December 1, 1999 (64 FR 67202)**Subject:** Fitness-for-duty

Summary: The petitioner requested that the Commission amend its regulations to: (1) add enforceable working hour limits to 10 CFR Part 26; (2) add a criterion to 10 CFR Part 55 to require evaluation of known sleeping disorders; (3) revise the Enforcement Policy to include examples of working hour violations warranting various NRC sanctions; and (4) revise NRC Form 396 to include self-disclosure of sleeping disorders by licensed operators. The petitioner also requested changes to NRC Inspection Procedure 81502, Fitness-for-Duty Program. The petitioner believes that clear and enforceable working hour limits are required to ensure that the impact of personal fatigue is minimized.

Timetable: A notice of receipt for this petition was published in the Federal Register on December 1, 1999 (65 FR 67202). The comment period closed on February 14, 2000. The staff is working to complete action documenting the resolution of the petition.

20. Petitioner/Petition Docket Number: Union of Concerned Scientists (PRM-30-62)

Federal Register Citation: October 27, 1999 (64 FR 57785)

Subject: Provide specific training to management on their obligations under the employee protection regulations

Summary: The petitioner requested that the Commission amend its regulations to require licensees to provide specific training to its management (i.e., first line supervisors, managers, directors, and officers), on their obligations under the employee protection regulations. The petitioner believes that the amendment would prevent nuclear energy management from using "ignorance of the law" as an excuse for a violation and allow the NRC to take enforcement actions against individuals who violate the employee protection regulation. The NRC staff has incorporated the concerns of this petition into the scope of an NRC Task Force to investigate handling of discrimination allegation matters. The Task Force recommendations are due to the Commission on June 30, 2001.

Timetable: A notice of receipt for this petition was published in the Federal Register on October 27, 1999 (64 FR 57785). The comment period closed on January 10, 2000. Resolution of this petition is scheduled for December 2001, following Commission review of the Task Force recommendations.

21. Petitioner/Petition Docket Number: Natural Resources Defense Council
(PRM-30-63)

Federal Register Citation: June 30, 2000 (65 FR 40548)

Subject: Requirement for individuals to report illegal payments to regulators

Summary: The petitioner requested that the Commission amend its regulations to require that an individual report illegal payments to regulators if the individual has knowledge or evidence of the illegal payments. The petitioner requests that an individual who fails to make such a report not be issued a license or allowed to retain a license.

Timetable: A notice of receipt for this petition was published in the Federal Register on June 30, 2000 (65 FR 40548). The comment period closed on September 13, 2000. Resolution of the petition is scheduled for June 2001.

22. Petitioner/Petition Docket Number: National Registry of Radiation Protection
Technologists (NRRPT) (PRM-35-13)

Federal Register Citation: February 8, 1996 (61 FR 4754)

Subject: Training requirements for a radiation safety officer

Summary: The petitioner requested that the Commission amend its regulations by including acceptance of NRRPT registration as fulfilling some of the training requirements for a radiation safety officer.

Timetable: A notice of receipt for this petition was published in the Federal Register on February 8, 1996 (61 FR 4754). The comment period closed on April 23, 1996. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Sam Jones, Office of Nuclear Material Safety and Safeguards,
(301) 415-6198, e-mail szj@nrc.gov

23. Petitioner/Petition Docket Number: Jeffery C. Angel (PRM-35-15)

Federal Register Citation: August 23, 1999 (64 FR 45907)

Subject: Hand-held administration of radiopharmaceuticals by injection

Summary: The petitioner requested that the Commission amend its regulations to prohibit the hand-held administration of radiopharmaceuticals by injection and to require the use of the Angel Shield. The petitioner believes that this would make the administration of radiopharmaceuticals by injection safer.

Timetable: A notice of receipt for this petition was published in the Federal Register on August 23, 1999 (64 FR 45907). The comment period closed on November 8, 1999. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Sam Jones, Office of Nuclear Material Safety and Safeguards,

24. Petitioner/Petition Docket Number: American National Standards Institute N43.10
Committee (PRM-36-1)

Federal Register Citation: September 15, 1998 (63 FR 49298)

Subject: Radiation safety requirements

Summary: The petitioner requested that the Commission amend its radiation safety requirements for irradiators to allow the operation of panoramic irradiator facilities without continuous onsite attendance.

Timetable: A notice of receipt for this petition was published in the Federal Register on September 15, 1998 (63 FR 49298). The comment period closed on November 30, 1998. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Thomas Young, Office of Nuclear Material Safety and Safeguards,
(301) 415-5795, e-mail tfy@nrc.gov

25. Petitioner/Petition Docket Number: Bob Christie (PRM-50-68)

Federal Register Citation: January 12, 2000 (65 FR 1829)

Subject: Hydrogen control systems

Summary: The petitioner requested that the Commission amend its regulations concerning hydrogen control systems at nuclear power plants. The petitioner believes that the current regulations on hydrogen control systems at some nuclear power plants are detrimental and present a health risk to the public. The petitioner believes that similar detrimental situations may apply to other systems as well. The petitioner believes the proposed amendments would eliminate those situations that present adverse conditions at nuclear power plants.

Timetable: A notice of receipt for this petition was published in the Federal Register on January 12, 2000 (65 FR 1829). The public comment period closed on March 27, 2000. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Anthony W. Markley, Office of Nuclear Reactor Regulation,
(301) 415-3165, e-mail awm@nrc.gov

26. Petitioner/Petition Docket Number: Westinghouse Electric Company (PRM-50-69)

Federal Register Citation: February 8, 2000 (65 FR 6044)

Subject: Reactor vessel head closure flange requirements

Summary: The petitioner requested that the Commission amend its regulations governing pressure and temperature limits for the reactor pressure vessel to eliminate requirements for the metal temperature of the closure head flange and vessel flange regions. The petitioner believes the elimination of the flange requirement has no impact on boiling water reactors and could improve plant safety in pressurized water reactors.

Timetable: A notice of receipt for this petition was published in the Federal Register on February 8, 2000 (65 FR 6044). The public comment period closed on April 24, 2000. The staff is working to complete action documenting the resolution of the petition.

Agency Contact: Allen L. Hiser, Jr., Office of Nuclear Reactor Regulation,
(301) 415-1034, e-mail alh1@nrc.gov

27. Petitioner/Petition Docket Number: Joseph Epstein (PRM-50-70)

Federal Register Citation: May 12, 2000 (65 FR 30550)

Subject: Financial assurance requirements for decommissioning nuclear power reactors

Summary: The petitioner requested that the Commission amend its financial assurance requirements for decommissioning nuclear power reactors to: (1) require uniform reporting and recordkeeping for all "proportional owners" of nuclear generating stations (defined by the petitioner as partial owners of nuclear generating stations who are not licensees); (2) modify and strengthen current nuclear decommissioning accounting requirements for proportional owners; and (3) require proportional owners to conduct a prudency review to determine a balanced formula for decommissioning funding that includes not only ratepayers and taxpayers, but shareholders and board members of rural electric cooperatives as well. The petitioner believes that the proposed amendments would eliminate the funding gap for decommissioning between nuclear power licensees and proportional owners of nuclear generating stations.

Timetable: A notice of receipt for this petition was published in the Federal Register on May 12, 2000 (65 FR 30550). The public comment period closed on July 26, 2000. Resolution of this petition is scheduled for May 2001.

Agency Contact: Brian J. Richter, Office of Nuclear Reactor Regulation,
(301) 415-1978, e-mail bjr@nrc.gov

28. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-50-71)

Federal Register Citation: May 31, 2000 (65 FR 34599)

Subject: Alternate cladding material

Summary: The petitioner requested that the Commission amend its regulations to allow nuclear power plant licensees to use zirconium-based cladding materials other than zircaloy or ZIRLO, provided the cladding materials meet the requirements for fuel cladding performance and have received approval by the NRC staff. The petitioner believes the proposed amendment would improve the efficiency of the regulatory process by eliminating the need for individual licensees to obtain exemptions to use advanced cladding materials that have already been approved by the NRC.

Timetable: A notice of receipt for this petition was published in the Federal Register on May 31, 2000 (65 FR 34599). The public comment period closed on August 14, 2000. Resolution of this petition is scheduled for May 2001.

Agency Contact: Sandra D. Frattali, Office of Nuclear Reactor Regulation,
(301) 415-3703, e-mail sdf@nrc.gov

29. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-51-7)

Federal Register Citation: September 2, 1999 (64 FR 48117)

Subject: Severe accident mitigation alternatives (SAMAs)

Summary: The petitioner requested that the Commission amend its regulations to eliminate the requirement that the NRC evaluate SAMAs as part of its review of a nuclear power plant's application for renewal of its operating license.

Timetable: A notice of receipt for this petition was published in the Federal Register on September 2, 1999 (64 FR 48117). The public comment period closed on November 16, 1999. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Donald P. Cleary, Office of Nuclear Reactor Regulation,
(301) 415-3903, e-mail dpc@nrc.gov

30. Petitioner/Petition Docket Number: Union of Concerned Scientists* (PRM-54-1)

Federal Register Citation: July 10, 2000 (65 FR 42305)

Subject: Aging degradation of liquid and gaseous radioactive waste systems

Summary: The petitioner requested that the Commission amend its regulations to address potential concerns about aging degradation of liquid and gaseous radioactive waste systems. The petitioner believes the degradation from aging of piping and components of liquid and gaseous radioactive waste systems at nuclear power plants may result in an increased probability and/or consequences from design and licensing bases events.

Timetable: A notice of receipt for this petition was published in the Federal Register on July 10, 2000 (65 FR 42305). The public comment period closed on September 25, 2000. Resolution of this petition is scheduled for July 2001.

Agency Contact: Stephen T. Hoffman, Office of Nuclear Reactor Regulation,
(301) 415-3245, e-mail sth@nrc.gov

31. Petitioner/Petition Docket Number: Prairie Island Coalition (PRM-72-4)

Federal Register Citation: March 12, 1998 (63 FR 12040)

Subject: Independent storage of spent nuclear fuel

Summary: The petitioner requested that the Commission amend its regulations which govern independent storage of spent nuclear fuel to examine certain issues. These issues include thermal shock and corrosion inherent in dry cask storage of spent nuclear fuel, definitions for degraded spent nuclear fuel, and definitions for retrievability of spent nuclear fuel from dry storage casks.

Timetable: A notice of receipt for this petition was published in the Federal Register on March 12, 1998 (63 FR 12040). The public comment period closed on May 26, 1998. The staff is working to complete NRC action documenting the resolution of the petition.

Agency Contact: Gordon Gundersen, Office of Nuclear Material Safety and Safeguards,
(301) 415-6195, e-mail geg1@nrc.gov

32. Petitioner/Petition Docket Number: Nuclear Energy Institute (PRM-72-5)

Federal Register Citation: June 9, 2000 (65 FR 36647)

Subject: Establishing a more efficient process for issuing and amending certificates of compliance (CoC)

Summary: The petitioner requested that the Commission amend its regulations to establish a more efficient process for issuing and amending CoCs for dry cask storage of spent nuclear fuel under a general license. The petitioner believes the current NRC process of traditional notice and comment rulemaking is not appropriate for the routine risk of maintaining a list of certified casks and that the burden of maintaining this listing in the regulations outweighs any benefit. The petitioner proposes that the list of CoCs be deleted from the regulations and the NRC should notice applications for new CoCs and amendments in the Federal Register for a 60-day comment period. The petitioner also proposes that amendments for existing CoCs that do not have the potential to have a significant impact on public health and safety be immediately effective upon publication of the amendment in the Federal Register.

Timetable: A notice of receipt for this petition was published in the Federal Register on June 9, 2000 (65 FR 36647). The comment period closed on August 23, 2000. Resolution of the petition is scheduled for June 2001.

Agency Contact: Merri Horn, Office of Nuclear Material Safety and Safeguards,
(301) 415-8126, e-mail mlh1@nrc.gov

33. Petitioner/Petition Docket Number: State of Nevada (PRM-73-10)

Federal Register Citation: September 13, 1999 (64 FR 49410)

Subject: Safeguards for shipments of spent nuclear fuel against sabotage and terrorism

Summary: The petitioner requested that the Commission conduct a comprehensive assessment of the consequences of terrorist attacks that have the capability of radiological sabotage, including attacks against transportation infrastructure used during nuclear waste shipments, attacks involving capture of nuclear waste shipments and use of high energy explosives against a cask or casks, and direct attacks upon a nuclear waste shipping cask or casks using antitank missiles or other military weapons.

Timetable: A notice of receipt for this petition was published in the Federal Register on September 13, 1999 (64 FR 49410). The public comment period closed on January 28, 2000. Resolution of the petition is scheduled for February 2001.

(301) 415-6229, e-mail jlt@nrc.gov

34. Petitioner/Petition Docket Number: United Plant Guard Workers of America
(PRM-76-1)

Federal Register Citation: May 10, 2000 (65 FR 30018)

Subject: Security at gaseous diffusion plants

Summary: The petitioner requested that the Commission amend its regulations concerning security at gaseous diffusion plants to address sites that have both special nuclear material security concerns and protection of classified matter concerns; to require that these facilities be able to detect, respond to, and mitigate threats of a sabotage event; and to require that the security force be armed and empowered to make arrests in limited situations. The petitioner believes that these amendments are necessary to address the protection of classified information, equipment and materials, and special nuclear material at the gaseous diffusion plants.

Timetable: A notice of receipt for this petition was published in the Federal Register on May 10, 2000 (65 FR 30018). The comment period closed on July 24, 2000. The staff is working to complete NRC action documenting the resolution of the petition.
