Conditions: Satisfactory; Marginal; Unsatisfactory; Not Applicable (S, M, U, NA)

I. <u> S </u> Administrative Control	IV. <u> S </u> Personnel Monitoring
II. <u> S </u> Material Licensed	<u> S </u> Radiation Survey Procedures
<u> S </u> Disposal	<u> S </u> Controlled Areas
III. <u> S </u> Lab Facilities	<u> S </u> Non-controlled areas
<u> S </u> Shielding	<u> S </u> Radiation Signs
<u> S </u> Equipment	V. <u> S </u> Records
<u> S </u> Instrumentation	VI. <u> S </u> Regulations
	VII. <u> S </u> Terms and Conditions

Critical Evaluations: (Summary of over-all program, discussion of specific marginal and unsatisfactory conditions with recommendations for corrective action.)

The facilities for the use of radioactive materials at this laboratory have been carefully planned and the radiological protection aspects of this program are excellent and tend to be overcautious. Dr. Snow indicated that they may wish to apply for a broad license at a later date, and it is my opinion that they fully qualify for such a license.

Dr. Snow stated that their results with isotopes for testing oils had been most gratifying and that tests were now completed in 4 hours that formerly required 100 hours and the data was more reliable.

 yes Revisit is Recommended: (When) when new facilities are completed (8 mos. to 1 yr.)
