February 15, 2001

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
COMMENTS ON DRAFT REGULATORY GUIDE DG 1096
AND THE DRAFT STANDARD REVIEW PLAN

Gentlemen:

The NRC staff has developed draft guidance to support the development and assessment of evaluation models that may be used to analyze transient and accident behavior (i.e., "Chapter 15" analyses). Public comments on the draft regulatory guide and draft standard review plan (SRP) section were requested by February 15, 2001. In response to this request, the NRC's draft Regulatory Guide DG-1096 "Transient and Accident Analysis Methods" (DG), the draft Standard Review Plan Section 15.0.2 "Review of Analytical Computer Codes" have been reviewed. The Strategic Teaming and Resource Sharing (STARS) nuclear power plants (the Callaway Plant, Comanche Peak Steam Electric Station, Diablo Canyon Power Plant, South Texas Project Electric Generating Station, and Wolf Creek Generating Station) agree and concur with the comments provided by the Nuclear Energy Institute (NEI) and separately by the Westinghouse Owners' Group.
