on the D. C. Cook Nuclear Plant

DATES: February 15, 2001

**ATTENDEES:**

S. Bajwa  
T. Bergman  
G. Grant  
A. Vogel  
J. Stang

B. Bartlett  
K. Coyne

Discussion Topics:

1. *Plant Status and Inspector Insights*

The resident inspectors provided a summary of plant activities. Both units continued to operate at full power with no significant equipment problems, with the exception of a Unit 2 plant shutdown due to rod control problems on January 23, 2001.

The inspectors discussed issues that were presented to the licensee during the most recent exit meeting.

2. *Discuss MC 0350 Focus Areas*

The Panel reviewed and discussed specific licensee performance areas that need to be assessed to determine adequacy of licensee long term corrective actions, while verifying licensee effectiveness in managing dual Unit operation. The panel discussed recent inspection results, current performance indicators, and licensee corrective actions related to the containment structural issues.

3. *Topics and Date of next 0350 Public Meeting.*

The next public meeting was proposed to be in late March 2001. Topics of discussion proposed were: licensee status of containment structure analysis, licensing actions related to upcoming refueling outages, and operational performance.
