REF: Reply to a Notice of Violation (NRC Inspection Report No. 150-00041/00-02)

Dear Sir/Madam:

The violation identified in the referenced inspection occurred during the planning of work to be performed for our Customer Concept Mining/Island Fork Mining. The scope of work included removal of the material from Concept Mining and transport to Island Fork Mining for re-installation. (Same Customer, adjacent property) in filing the NRC Form 241 the removal of material from Concept was not identified, only the installation at Island Fork.

Corrective action taken to prevent future occurrences are discussing this violation with all persons involved in material handling and retraining of persons to require reading of scope as specified on the NRC Form 241 prior to any activities. Ensuring the activities planned is accurately described. Filing and amendment should a discrepancy be identified.

Review and retraining of all personnel has been completed.

Should additional information of discussion be required, please contact me at (865) 927-9330.

Sincerely,

David K. Swindell
RSO, President
