

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

April 3, 1988

MEMORANDUM FOR: Victor Stello, Jr.
Executive Director for ions

FROM: Samuel J. Chilk, Secret

SUBJECT: STAFF REQUIREMENTS - BRIEFING ON HIGH PRIORITY
AEOD ISSUES, 2:00 P.M., THURSDAY, MARCH 31,
1988, COMMISSIONERS' CONFERENCE ROOM, D.C.
OFFICE (OPEN TO PUBLIC ATTENDANCE)

The Commission was briefed by the staff on AEOD (Office of Analysis and Evaluation of Operational Data) priority issues and coordination of findings within the NRC.

The Commission requested the staff to focus on the following issues at the next AEOD report to the Commission:

- Ø mechanisms for integrating and coordinating AEOD recommendations with other NRC offices;
- Ø illustrations of how AEOD recommendations are followed through and how the loop of inter-office coordination is being closed; and
- Ø how human factor aspects are evaluated and factored into the analyses.
(EDO) (SECY Suspense: TBD)

Chairman Zech and Commissioner Carr cautioned the staff not to overlook plants for which complacency might be a problem.

Chairman Zech cautioned AEOD not to set too high of a threshold which elevates an AEOD "suggestion" up to a "recommendation." Chairman Zech also requested the staff to keep the designers informed of the results of the AEOD studies.
