

11/23/99

Meeting Farouk, J Hannon, and others:

~~Uncertainty~~
~~Cost public~~
~~A CRS concern~~
~~Finalizing report~~
~~Going into conference~~
~~Ru release~~

Farouk:

- 1) TH -- Results of 3D CFD calcs.
- 2) Consequence -- more realistic assessment.

Consequence Analysis

- We know certain conservatism in consequence analysis.
- Do you want this additional work?

Chris Boyd:

TH

- Qualitative results

B/34

NRE:

Consequence assessment:

- User need has been fulfilled.
- Ru - Canadian info.
- NO_3 release
- Zr hydride

Add things within time needed to respond to ARS.

Addressing ARS concerns ... can do this a little later.

Identify Areas for future research {
- of conservation
- of uncertainty
large

by Dec 10

answers in February, when go
back to ARS. (January 14)

Farrah said OK & this.

J. Hermann's • BC interaction needed prior to issuing my memo.

FE/tawila • I agree
