

11/8/99

CT:

SFP dose calc -- do a couple more

1. Change 4 run to 2 run
2. Change Ruthenium release - T vs volatility

Write another memo to - HRR.

B/206

CT:

1/5/99

I. Followup on Ruthenium Release (from today's ACS meeting)

• what does NRC think

• what do Canadians think

• look at Dana's report on air ingestion

• what chemical forms could ruthenium have?

II. Followup on hydride nodules phenomenon / talk w/ D. Powers about this.

11/5/99

SFP Consequences

Disc w/ CT:

- Less Cs release
- Longer release duration
- Credit for aerosol dep. prior to going offsite.

11/15/99

Jason:

Run MACEs w/ 1 core at final S/D
to compare w/ an SFP accident.

(CT said OK.)

a Severe Reactor accident
